QUESTION 2

You need to recommend which type of clustered file server and which type of file share must be used in the Hyper-V cluster that hosts App2. The solution must meet the technical requirements and the security requirements.

solution: You recommend a scaleout file server that uses an NFS share.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 3

You need to ensure that the developers can manage their own virtual machines.

Solution: You perform the following actions:

In Virtual Machine Manager, you create a new user role named DevUsers that uses the Application Administrator profile.

You create and publish a request offering that allows the DevUsers role to create checkpoints.

You grant Checkpoint permissions to the DevUsers role.

You distribute the SelfService Portal to the developers.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 4

Your network contains three networks named LAN1, LAN2, and LAN3. You have a HyperV host named Hyper1 that has Windows Server 2012 installed. Hyper1 has three network adapters. The network adapters are configured as shown

in the following table. Hyper1 hosts 10 virtual machines. A virtual machine named VMI runs a lineofbusiness application that is used by all of the users of LAN1. All of the other virtual machines are connected to LAN2.

You need to implement a solution to ensure that users can access VMI if either NIC1 or NIC2 fails.

What should you do?

Network adapter name	Network
NIC1	LAN1
NIC2	LAN1
NIC3	LAN2

- A. From the properties of each virtual network adapter, enable network adapter teaming, and then modify the bandwidth management settings.
- B. From the properties of each virtual network adapter, enable network adapter teaming, and then enable virtual LAN identification.
- C. From the properties of each physical network adapter, enable network adapter teaming, and then add a second legacy network adapter to VML.
- D. From the properties of each physical network adapter, enable network adapter teaming, and then create a virtual switch.

Correct Answer: D

QUESTION 5

Your network contains an Active Directory domain named contoso.com. The network contains a perimeter network. The perimeter network and the internal network are separated by a firewall. On the perimeter network, you deploy a server named Server1 that runs Windows Server 2012.

You deploy Active Directory Certificate Services (AD CS).

Each user is issued a smart card.

Users report that when they work remotely, they are unable to renew their smart card certificate. You need to recommend a solution to ensure that the users can renew their smart card certificate from the Internet.

What should you recommend implementing on Server1?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. The Certificate Enrollment Policy Web Service role service and the Certificate Enrollment Web Service role service
- B. The Active Directory Federation Services server role
- C. An additional certification authority (CA) and the Online Responder role service
- D. The Certification Authority Web Enrollment role service and the Online Responder role service

Correct Answer: A
