QUESTION 1

Your company has a private cloud that is managed by using a System Center 2012 infrastructure.

The network contains a Service Manager infrastructure.

The company implements a service level agreement (SLA) for the private cloud.

You need to recommend an escalation notification solution for when an SLA warning threshold is exceeded.

What should you include in the recommendation?

A. A subscription

B. A Desired Configuration Management Event Workflow Configuration

C. An incident event workflow

D. A monitor

E. A rule

Correct Answer: C

You can use the following procedure to create a workflow rule that will change the support tier to Tier 2 whenever the Urgency property of an incident that is related to printing problems is changed to High.

This procedure assumes that you already created an incident template to change the support tier to Tier 2, and it assumes that you already created the priority calculation table.

For more information, see How to Set Incident Priority and "To create a new printer-related incident template" in How to Create Incident Templates. http://technet.microsoft.com/en-us/library/ff461123.aspx

QUESTION 2

You have a System Center 2012 Virtual Machine Manager (VMM) infrastructure that contains one virtualization host named Server1.
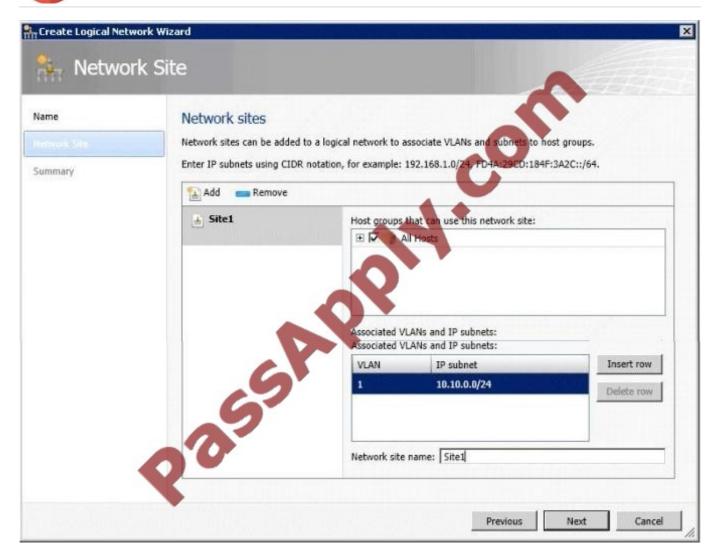

You configure a logical network named Network1 that contains a network site named Site1.

DHCP allocates IP addresses on the network.

You configure the logical network as shown in the exhibit. (Click the Exhibit button.)

You need to ensure that the virtual machines on VLAN 1 are assigned IP addresses from DHCP only. What should you do?

A. From the Network Site properties, remove the subnet assignment.

B. From Windows Firewall on Server1, create an inbound rule.

C. From the Network Site properties, remove the VLAN assignment.

D. From the logical network configuration, remove the network site.

Correct Answer: A

Reference:

http://technet.microsoft.com/en-us/library/gg610596.aspx

If you want to use DHCP that is already available on the network to assign IP addresses to virtual devices in a specified VLAN, create network sites with only VLANs assigned.

QUESTION 3

You need to perform IAAS on demand backup of server2 with most resent files to azure backup

A. create Incremental backup then create a restore point

B. create express full backup then create a restore point

C. Create a restore point then create Only-Synchronization

D. Schedule a daily backup then create a restore point

Correct Answer: C

QUESTION 4

You need to recommend a solution to deploy the Hyper-V hosts. The solution must meet the technical requirements.

Which System Center 2012 product should you include in the recommendation? (More than one answer choice may achieve the goal. Select the BEST answer.)

A. Virtual Machine Manager

B. Orchestrator

C. App Controller

D. Configuration Manager

Correct Answer: A

QUESTION 5

You need to recommend which actions must be performed to integrate the private cloud components. The solution must meet the private cloud integration requirements.

From which System Center 2012 component should you perform each action? (To answer, drag the appropriate components to the correct actions. Each component may be used once, more than once, or not at all. You may need to drag the
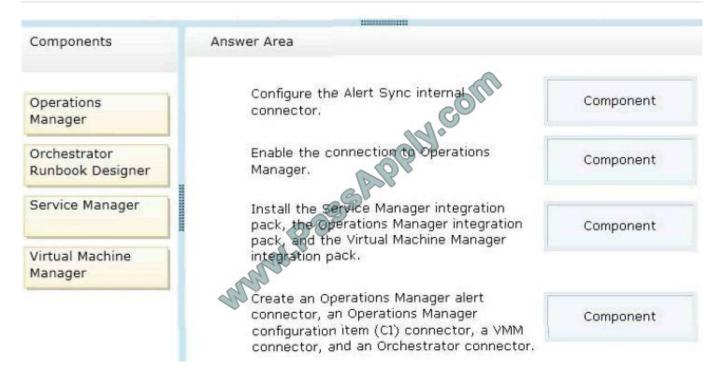

split bar between panes or scroll to view content.)
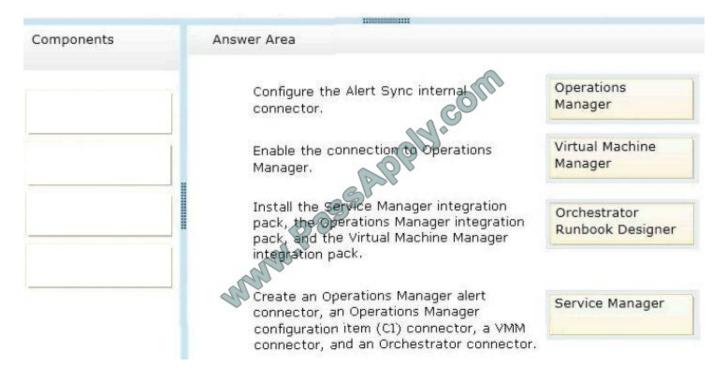

Select and Place:

Components	Answer Area	
Operations Manager	Configure the Alert Sync internal connector.	**Component**
Orchestrator Runbook Designer	Enable the connection to Operations Manager.	**Component**
Service Manager	Install the Service Manager integration pack, the Operations Manager integration pack, and the Virtual Machine Manager integration pack.	**Component**
Virtual Machine Manager	Create an Operations Manager alert connector, an Operations Manager configuration item (C1) connector, a VMM connector, and an Orchestrator connector.	**Component**

Correct Answer:

Components	Answer Area	
	Configure the Alert Sync internal connector.	**Operations Manager**
	Enable the connection to Operations Manager.	**Virtual Machine Manager**
	Install the Service Manager integration pack, the Operations Manager integration pack, and the Virtual Machine Manager integration pack.	**Orchestrator Runbook Designer**
	Create an Operations Manager alert connector, an Operations Manager configuration item (C1) connector, a VMM connector, and an Orchestrator connector.	**Service Manager**
