QUESTION 1

You need to implement a software inventory solution for the A. Datum network. The solution must meet the technical requirements. What should you implement?

A. The Microsoft Deployment Toolkit (MDT).

B. The Microsoft Assessment and Planning (MAP) Toolkit.

C. The Windows Assessment and Deployment Kit (Windows ADK).

D. Windows Intune.

Correct Answer: B

Intune requires an agent installed which is a direct conflict with the technical requirement to not install additional software

(http://www.microsoft.com/sam/en/us/intune.aspx)

MAP is an agent-less inventory service (http://www.microsoft.com/sam/en/us/map.aspx)

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains 2,000 client computers that run either Windows 7 or Windows 8.

Version 1.0 of a custom application named App1 is deployed to all of the client computers by using a Group Policy object (GPO).

You obtain version 2.0 of App1.

You need to upgrade App1 to version 2.0 on the client computers that run Windows 8 only. App1 must be upgraded when each client computer restarts.

What should you do?

More than one answer choice may achieve the goal. Select the BEST answer.

A. Assign version 2.0 of App1 by using a new GPO. Configure WMI filtering on the GPO.

B. Publish version 2.0 of App1 by using a new GPO. Configure WMI filtering on the GPO.

C. Publish version 2.0 of App1 by using a new GPO. Configure security filtering on the GPO.

D. Assign version 2.0 of App1 by using a new GPO. Configure security filtering on the GPO.

Correct Answer: A

Publishing an application only makes the application available and does not install the app. WMI filtering allows you to specify OS.
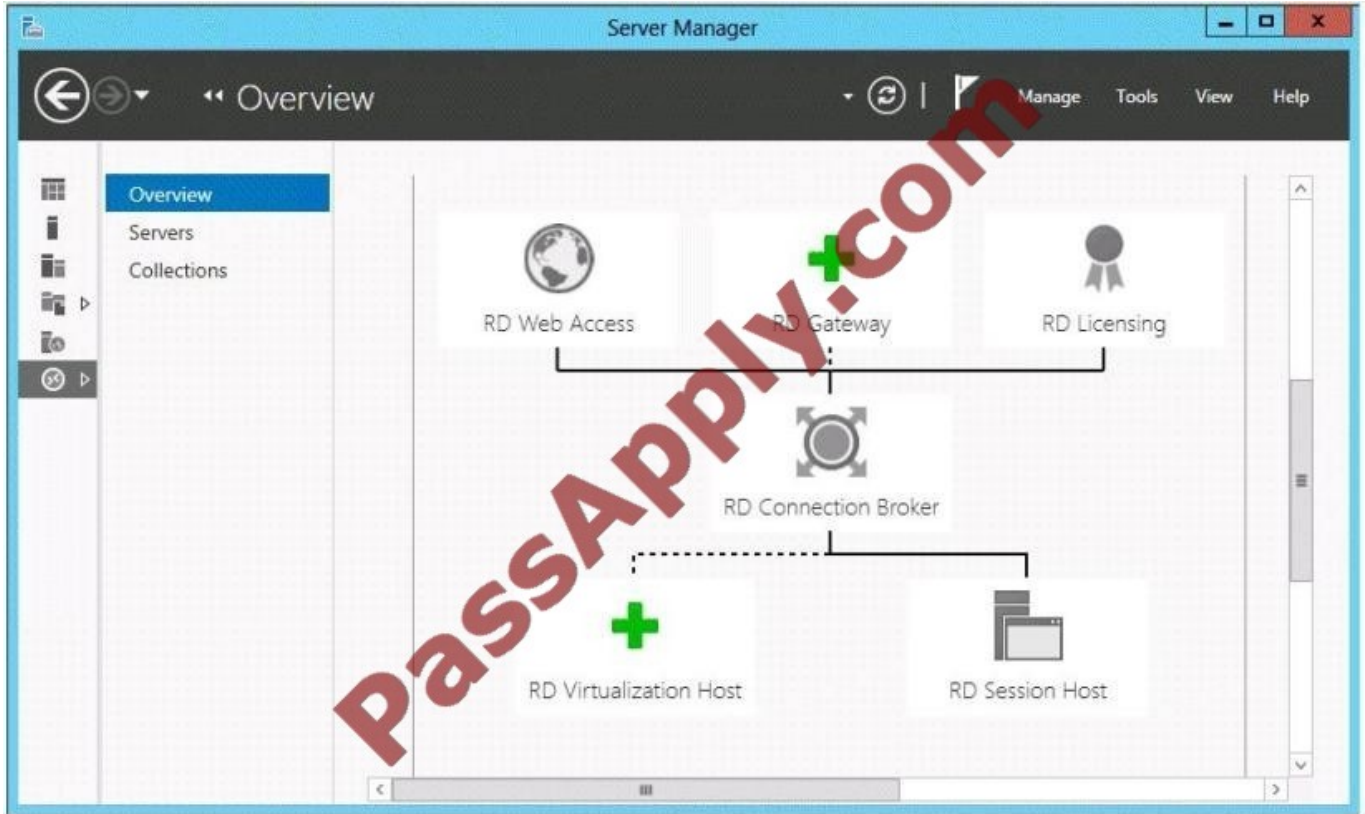

QUESTION 3

You have a server named Server1.

You open Server Manager on Server1 as shown in the exhibit. (Click the Exhibit button.)

You need to ensure that you can publish RemoteApp programs. What should you do?

A. Create a Remote Desktop connection authorization policy (RD CAP).

B. Install the Remote Desktop Gateway role service.

C. Create a collection.

D. Install the Remote Desktop Virtualization Host role service.

Correct Answer: C

A RD CAP isn\\'t right as this isn\\'t a RD Gateway scenario B RD Gateway doesn\\'t appear to be in play her

C RemoteApp programs are published to either a session collection or virtual desktop collection using

Server Manager.

D RD Virtual Host implies we are using a VDI pool and that doesn\\'t appear to be the case with a RemoteApp.

Test Lab Guide: Remote Desktop Services Publishing http://technet.microsoft.com/en-us/library/hh831442.aspx
http://class10e.com/Microsoft/you-need-to-ensure-that-you-can-publish-remoteapp- programs/

QUESTION 4

You need to configure RDS to use certificates to meet the sales department requirements. What should you do?

A. On the RD Virtualization Host servers, install a certificate in the personal store of the local computer.

B. On the RD Web Access servers, edit the properties of the RDWeb website.

C. On the RD Connection Broker servers, edit the deployment properties.

D. On the RD Connection Broker servers, edit the collection properties.

Correct Answer: C

The company identifies the following requirements for the sales users:

-All of the files on the laptop computers must be encrypted.

-The amount of administrative effort must be minimized whenever possible.

-Certificate warnings must not be displayed when connecting to virtual desktops.

-

The availability of the virtual desktops must not be affected by a single server failure.

-

The desktop computers of the sales users must be replaced by virtual desktops that run Windows 8.

-

The contents of each sales user\\'s Documents folder must be the same on the virtual desktop and the laptop computer.

-

The sales users must be able to connect to their virtual desktop from their laptop computer without using a VPN connection.

-

The sales users must be able to configure their user settings independently on their virtual desktop and their laptop computer.

-

The line-of-business applications must be installed on the virtual desktops only. The lineof-business applications require hardware acceleration to run.

Once this certificate has been created it needs to be applied to the RD Gateway and RD Web Access servers.

This is done in the RDS Deployment Properties

QUESTION 5

You need to recommend a solution for managing the user state of the virtual desktops. The solution must meet the sales department requirements. What should you include in the recommendation?

A. Roaming profiles and home folders.

B. Roaming profiles and Folder Redirection.

C. User profile disks and Folder Redirection.

D. User profile disks and roaming profiles.

Correct Answer: C

The sales users must be able to configure their user settings independently on their virtual desktop and their laptop computer.

The contents of each sales user\\'s Documents folder must be the same on the virtual desktop and the laptop computer.

User profile disks:

As the user logs on to different virtual machines within the pool or different hosts within the session collection, the User Profile Disk gets mounted, providing access to the complete profile.

Folder Redirection:

The contents of each sales user\\'s Documents folder must be the same on the virtual desktop and the laptop computer.
