QUESTION 1

You need to install Office 2010 on virtual desktops that run Windows 8. The virtual desktops will be used by the research users in the Miami office. The solution must meet the technical requirements. What should you do first?

- A. Run the App-V client setup and specify the /sharedcontentstoremode switch.
- B. Run the App-V client setup and specify the /migrationmode switch.
- C. Run the Office Customization Tool (OCT).
- D. Run the Office Migration Planning Manager (OMPM).

Correct Answer: A

QUESTION 2

You have a virtual infrastructure. The infrastructure contains servers that run Windows Server 2012 and have Microsoft Application Virtualization (App-V) 5.0 installed.

You sequence an application named App1, and then assign App1 by using a Group Policy object (GPO) named GPO1.

The manufacturer of App1 releases an update named Updateappl.msi.

You need to deploy the updated version of App1 to all of the App-V 5.0 clients. The solution must ensure that all of the App-V 5.0 clients only run the updated version of Appl.

What should you do?

- A. Create a new GPO, and then assign Updateapp1.msi.
- B. From the App-V Sequencer, sequence Updateappl.msi, and then create a new GPO.
- C. From the App-V Sequencer, update App1.appv, and then modify the GPO.
- D. Create a new GPO, and then publish Updateappl.msi.

Correct Answer: B

QUESTION 3

Your network contains an Active Directory domain named contoso.com. All client computers run Windows 7.

You plan to upgrade all of the client computers to Windows 8.

You install the Microsoft Application Compatibility Toolkit (ACT) on a server named Server1.

You configure Server1 to host the Log Processing Service shared folder,

You need to recommend which permissions must be assigned to the Log Processing Service shared folder. The solution must provide the least amount of permissions to the shared folder.

Which permissions should you recommend assigning to the Everyone group on the shared folder? (Each correct answer presents part of the solution. Choose all that apply.)

- A. Write NTFS permissions
- B. Read NTFS permissions
- C. Change Share permissions
- D. Read NTFS permissions and Execute NTFS permissions
- E. Read Share permissions

Correct Answer: ACE

<http://technet.microsoft.com/en-us/library/hh824812.aspx> The Everyone group must have Change and Read permissions to the ACT LPS share. The Everyone group must have Write access to the ACT LPS share.

QUESTION 4

Your company plans to implement a monitoring solution for application licenses.

The corporate management policy states that all newly deployed technologies must be cloud-based.

You need to recommend a license monitoring solution that meets the management policy.

Which license monitoring solution should you recommend?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. The Microsoft Asset Inventory Service (AIS)
- B. Asset Intelligence in Microsoft System Center 2012 Configuration Manager
- C. The Microsoft License Statement tool
- D. The Microsoft Assessment and Planning (MAP) Toolkit

Correct Answer: A

QUESTION 5

Your network contains an Active Directory domain named contoso.com. The domain contains five servers. The servers are configured as shown in the following table.

Server name	Configuration
Server1	Microsoft System Center 2012 Service Manager
Server2	Microsoft System Center 2012 Virtual Machine Manager (VMM) Administrator Console
Server3	Microsoft System Center 2012 Virtual Machine Manager (VMM) management server
Server4	Library server
Server5	Hyper-V host

You plan to deploy the Virtual Machine Servicing Tool (VMST) 3.0. You need to identify on which server VMST 3.0 must be installed. Which server should you identify?

- A. Server1
- B. Server2
- C. Server3
- D. Server4
- E. Server5

Correct Answer: B

VMST3 must be installed on the same server as the VMM Administrator Console (which provides the Windows PowerShell support).
