QUESTION 1

There are often disadvantages when using mixed hardware, and uniform systems are highly advised. What are three disadvantages of using validated yet mixed hardware? (Choose three.)

A. "Hardware only" solutions require less latency for data aggregation.

B. "Software only" solutions are inherently more secure, adhering to government regulations.

C. "Software only" HCI solutions often mean that HCI vendors do not have control over the hardware that the consumer is using. The lack of control over the hardware can result in hardware not being security-compliant (usually the case with white box solutions) or not being optimally configured for the given HCI solution.

D. Validated yet "mixed" hardware systems may be supported by the specific original equipment manufacturers but software vendors require a master level services agreement.

E. "Software only" solutions can result in a lack of simplicity for installation and maintenance. While setup and maintenance of an HCI solution might be simple you still need to configure and maintain the hardware part, which is not orchestrated by the HCI solution.

F. Validated hardware does not mean smooth performance, which particularly applies to hardware that is seldom chosen for the hardware part of the "software only" solution.

Correct Answer: CEF

QUESTION 2

HyperFlex uses file system native snapshots and provides which three features? (Choose three.)

A. on datastore level, snapshots work the same as vSphere snapshots

B. automatically deduplicating data of snapshots through StorFS

C. impact on the VM performance after a lot of writes, requiring future administration

D. limitations in age and number of snapshots. See user manual for limitations

E. consolidation of snapshots is still manual but not necessary

F. automatic update to the golden image when a configuration change is made

Correct Answer: ABD

QUESTION 3

HyperFlex is tightly integrated Into the Cisco portfolio, allowing which two powerful service integrations\\'\\' (Choose two)

A. Cloud mobility: CloudCenter enables workload mobility between HyperFlex and public and private clouds, Including

private cloud self-service Infrastructure as a service (IaaS) capabilities

B. Application centric infrastructure: ACI enables faster deployment via End-Point Group integration of the HyperFlex clusters into existing application environments

C. Multi-cloud integration Workloads are able to seamlessly migrate to platforms such as Amazon Web Services: Microsoft Azure and Google Cloud Platform

D. On-premise container platform: Cisco Container Platform automates repetitive tasks, such as installing Kubernetes and Docker, installing analytics tools, creating clusters, load balancing, curatmg the OS. and even updating the distribution

E. Data Center Network Monitor: This management platform enables administrators to monitor storage In the HyperFlex solution and provide real-time storage performance for the HyperFlex cluster

Correct Answer: AD

QUESTION 4

What is required to cluster a pair of Fabric Interconnects?

A. uplink connections to the enterprise network

B. HXDP 3.5.2 or better

C. connection between the FI pair using ports L1 and L2

D. UCS Manager 2.1 or better

Correct Answer: C

QUESTION 5

Drag the server type from the left onto the maximum number of capacity drives on the right.

Select and Place:

HX220c-M5SX		6-12
HX240c-M5SX		6-8
HX240c-M5L		6-23

Correct Answer:

	HX240c-M5L	6-12
	HX220c-M5SX	6-8
	HX240c-M5SX	6-23
