QUESTION 1

The following command is issued on two docker nodes:

docker network create --driver bridge isolated_nw

Afterwards, one container is started at each node with the parameter --network=isolated_nw. It turns out that the containers can not interact with each other.

What must be done in order to allow the containers to interact with each other? (Choose two correct answers.)

A. Use a host network instead of a bridged network.

B. Add the option --inter-container to the docker network create command.

C. Start the containers on the same node.

D. Change the --network parameter of docker create to --network=isolated_nw,nofence.

E. Use an overlay network instead of a bridged network.

Correct Answer: CE

https://docs.docker.com/v17.09/engine/userguide/networking/#bridge-networks

QUESTION 2

Which vagrant sub command executes a command in a running box? (Specify only the sub command without any path or parameters.)

A. ssh

Correct Answer: A

QUESTION 3

Which of the following commands lists the nodes in a Docker Swam cluster?

A. docker-swarm listnodes

B. docker engine ls
