-  **800,000+** Satisfied Customers

QUESTION 1

Which file contains the global Ansible configuration?

- A. /etc/ansible.conf
- B. /etc/ansible/master.conf
- C. /etc/ansible.d/main.conf
- D. /etc/ansible/ansible.cfg
- E. /etc/ansible/all.vars

Correct Answer: D

QUESTION 2

What statement is true regarding the Swarm service created by the following command?

```
docker service create --name myweb --network webnet --mode global nginx
```

- A. It runs exactly one time in the Swarm and cannot be scaled.
- B. It runs exactly once on each node in a Swarm.
- C. It runs on one node by default and can be scaled to an arbitrary number of replicas.
- D. It runs on all nodes which provide the network webnet.
- E. It runs only on those nodes which support the network type global.

Correct Answer: B

QUESTION 3

If docker stack is to be used to run a Docker Compose file on a Docker Swarm, how are the images referenced in the Docker Compose configuration made available on the Swarm nodes?

- A. Docker stack instructs the Swarm nodes to pull the images from a registry, although it does not upload the images to the registry.
- B. Docker stack transfers the image from its local Docker cache to each Swarm node.
- C. Docker stack passes the images to the Swarm master which distributes the images to all other Swarm nodes.
- D. Docker stack builds the images locally and copies them to only those Swarm nodes which run the service.
- E. Docker stack triggers the build process for the images on all nodes of the Swarm.

Correct Answer: B

QUESTION 4

What is the purpose of a .dockerignore file?

- A. It specifies which parts of a Dockerfile should be ignored when building a Docker image.
- B. It must be placed in the top level directory of volumes that Docker should never attach automatically to a container.
- C. It exists in the root file system of containers that should ignore volumes and ports provided by Docker.
- D. It specifies files that Docker does not submit to the Docker daemon when building a Docker image.
- E. It lists files existing in a Docker image which should be excluded when building a derivative image.

Correct Answer: D

QUESTION 5

Which git sub command copies a local commit to a remote repository? (Specify ONLY the sub command without any path or parameters.)

- A. push

Correct Answer: A
