QUESTION 1

You support a customer whose network environment includes Microsoft Lync Server 2013 Standard deployed with an Edge Server that is connected to the Internet. Some users have Lync Mobile installed on their mobile devices.

When the users attempt to sign in to Lync from their mobile devices on a carrier network, they receive the following error message: "Cannot connect to the server."

It might be unavailable. Also please check your network connection, sign-in address, and server addresses."

You need to ensure that users are able to sign in to Lync from their mobile devices on a carrier network.

What should you do?

- A. Add a LyncDiscover DNS entry that points to the Lync Edge Server.
- B. Add a LyncDiscover DNS entry that points to the Lync Front End Pool Server by using a reverse proxy.
- C. Add a LyncDiscoverInternal DNS entry that points to the Lync Edge Server.
- D. Add a LyncDiscoverInternal DNS entry that points to the Lync Front End Pool Server by using a reverse proxy.

Correct Answer: B

QUESTION 2

You support a customer whose Microsoft Lync Server 2013 Enterprise Pool is configured with Enterprise Voice and Dial-in Conferencing. You specify a Session Initiation Protocol (SIP) Uniform Resource Identifier (URI) for the dial-in conferencing access number.

You discover that the SIP URI was configured incorrectly.

You need to change the SIP URI.

What should you do?

- A. Run the Set-CsDialInConferencingAccessNumber cmdlet.
- B. Delete the object and recreate the access number.
- C. Run the Set-CsSipResponseCodeTranslationRule cmdlet.
- D. Run the New-CsDialInConferencingDtmfConfiguration cmdlet.

Correct Answer: B

QUESTION 3

You support a customer whose Microsoft Lync Server 2013 Enterprise environment that is configured with Enterprise Voice and Dial-in Conferencing.

You remove the server that is hosting the File Store by using the Lync Topology Builder. You add and define a new file server and publish the topology.

Conference attendees report that they no longer hear their names played when they join or leave a conference.

You need to ensure that conference attendees hear their names played when they join or leave a conference.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Run the Test-CsDialInConferencing cmdlet.
- B. Restart the Conferencing Attendant application.
- C. Run the Set-CsDialInConferencingConfiguration cmdlet.
- D. Restart the Conferencing Announcement application.

Correct Answer: BD

QUESTION 4

You support a customer whose network environment includes Microsoft Exchange 2010 and Microsoft Lync Server 2010 servers. Outlook Web Access (OWA) is configured to display presence from Lync.

Your customer recently migrated users and servers to a Microsoft Lync Server 2013 environment.

Users report that presence is no longer available in OWA.

You need to restore presence in OWA.

Which cmdlet should you run on each server? (To answer, drag the appropriate cmdlet to the correct server or servers. Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll

to view content.)

Select and Place:

The screenshot shows a management console with a left sidebar labeled 'cmdlet' and a main area labeled 'Server'. The 'cmdlet' list includes: Remove-CsTrustedApplicationPool, New-CsTrustedApplication, Enable-CsTopology, Set-OwaVirtualDirectory, Remove-CsTrustedApplication, and New-OwaVirtualDirectory. The 'Server' list includes: Lync Server 2010, Lync Server 2013, Lync Server 2013, and Exchange Server 2010. Each server entry has a corresponding empty blue box to its right.

Correct Answer:

The screenshot shows the same management console as above, but with cmdlets assigned to the servers. The 'cmdlet' list now only contains: Remove-CsTrustedApplication and New-OwaVirtualDirectory. The 'Server' list has the following assignments: Lync Server 2010 is assigned 'Remove-CsTrustedApplicationPool'; Lync Server 2013 is assigned 'New-CsTrustedApplication'; Lync Server 2013 is assigned 'Enable-CsTopology'; and Exchange Server 2010 is assigned 'Set-OwaVirtualDirectory'.

QUESTION 5

You support a customer whose network environment that includes Microsoft Lync Server 2013 Standard Edition.

A user uploads an inappropriate photo to his Lync profile. Your customer wants to remove the ability for users to display any photo in their Lync profile until the company can put a profile image policy in place.

You need to remove the ability for users to display profile photos within Lync.

Which cmdlet should you run?

- A. Set-CsClientPolicy -Identity Global -DisplayPhotoNoPhoto
- B. Set-CsClientPolicy -Identity Global -EnableAppearOffline \$true
- C. Set-CsUserServicesPolicy -Identity Global -UcsAllowed \$true
- D. Get-CsClient Policy | Set-CsClient Policy -ExcludedContactFolders "Contacts"

Correct Answer: A
