### QUESTION 1

You are a program manager in the Project Management Office (PMO) of an organization that has Project Server 2013. You plan to have a weekly project meeting review with all the project managers, and one of the topics that you will cover is

the status of all active Issues. You need to create a report that displays the following information:

Name, Status, Priority, and Resolution of all Issues  
Name, Owner, and Start and Finish date of all projects  
What should you do?

- A. Create a Microsoft Excel Services report that pulls information from the Issues cube.
- B. Create a Microsoft Excel Services report that pulls information from the Microsoft SharePoint Configuration Database.
- C. Create a Microsoft Excel Services report that pulls information from the Microsoft SharePoint Content Database.
- D. Create a Microsoft Excel Services report that pulls information from the Project Server 2013 database.

Correct Answer: D

---

### QUESTION 2

#### DRAG DROP

You are a program manager with administrator rights/ and you use Project Server 2013 to implement a data warehouse. You set up your program master project with subprojects for each implementation area. You need to use the Project Center view to create a custom view of the data warehouse projects for your vice president. Which four actions should you perform in sequence? (To answer, move the appropriate four actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Steps to accomplish the task	Order of the steps to accomplish the task
Open Project Web App (PWA) settings, create a new Project Center view for the program, and add the new custom field to the view. Filter for the code specific to the program, and enable security access for the required category groups.	
Open the Project Web App (PWA) and use PWA to open each project required. Use project details to add the program level code value to each of the projects in the program.	
Open Project Web App (PWA) settings and create an enterprise custom field to associate each project to a program ID.	
Open the Project Web App (PWA) and choose the new program view.	

Correct Answer:

Steps to accomplish the task	Order of the steps to accomplish the task
	Open Project Web App (PWA) settings and create an enterprise custom field to associate each project to a program ID.
	Open Project Web App (PWA) settings, create a new Project Center view for the program, and add the new custom field to the view. Filter for the code specific to the program, and enable security access for the required category groups.
	Open the Project Web App (PWA) and choose the new program view.
	Open the Project Web App (PWA) and use PWA to open each project required. Use project details to add the program level code value to each of the projects in the program.

### QUESTION 3

You are a project manager in an organization that uses Project Server 2013. All project managers have permission to edit all projects. You edit a project in Project Web App (PWA), make changes, publish the project, and close your browser. A project manager calls you to report they are unable to open your project for edit in PWA. You need to resolve

this issue. What should you do?

- A. Advise the project manager to open the project in Project Professional 2013.
- B. Open Project Professional 2013 and use the Clean Up Cache button.
- C. Open the Project Center in PWA and use the Check in My Projects button.
- D. Open the Project Center in PWA and use the Project Permissions button.

Correct Answer: C

---

#### QUESTION 4

Your organization is performing a Portfolio Analysis in Project Server 2013. You want to create a consolidated Portfolio Analysis optimization based on Cost and Resource data, which will be part of the project information in Project Server 2013. You plan to provide different simulations to your organization by using those parameters and returning the best prioritization. This organization has two different unit directors, who have the final decision on the consolidated Portfolio Analysis results. You need to provide the ability for your unit directors to modify the final portfolio selection. Which element should you use?

- A. Resource Requirements
- B. Project/Proposal Priority
- C. Field Cost Constraint
- D. Project Original Start
- E. Field Force In/Out

Correct Answer: E

---

#### QUESTION 5

Your organization is a multinational corporation that uses Project Online to plan and control the projects in different business units. Each business unit has its own portfolio of projects but can participate in strategic projects. The Research and Development (RandD) department has been struggling to gather and materialize the new ideas. The Project Management Office (PMO) has the necessary templates and Enterprise Project Types (EPTs) to start a formal process for any new product and to adhere to the general guidelines. However, the RandD group does not want to register all of their ideas since many are related to improvements and few of them could be materialized into projects. You need to generate a solution that allows RandD to gather their ideas and facilitate the materialization into Enterprise Projects. What should you do?

- A. Create a new EPT for the SharePoint Task List and name it RandD New Idea.
- B. Within the same site collection of Project Web App (PWA), create a Custom SharePoint Item List for ideation and requests with custom fields that easily match with Project custom fields when using the Add SharePoint Sites command in Project Center.
- C. Create a new EPT for Enterprise Projects and name it RandD New Idea.
- D. Within the same site collection of Project Web App (PWA), create a custom list for ideation and match list columns

with Project custom fields when using the Create Projects command in the SharePoint Item List.

Correct Answer: D
