Following Questions and Answers are all new published by Microsoft Official Exam Center

QUESTION 1

You are preparing a new Windows 8 image. The image will be deployed to the computers sold by your company.

You need to add the company\\'s technical support hours, technical support phone number, and technical support URL to the image.

Which component of the answer file should you modify?

A. Microsoft-Windows-Setup

B. Microsoft-Windows-Shell-Setup

C. Microsoft-Windows-RemoteAssistance-Exe

D. Microsoft-Windows-HelpAndSupport

Correct Answer: D

QUESTION 2

You have a technician computer that has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You have a Windows Preinstallation Environment (Windows PE) image.

You plan to optimize the Windows PE image by removing unnecessary components from the im- age.

You need to enable profiling for the image.

Which package should you add to the base Windows PE image before you can enable profiling?

A. winpe-setup.cab

B. winpe-mdac.cab

C. winpe-scripting.cab

D. winpe-wmi.cab

Correct Answer: D

QUESTION 3

You create and deploy an image to a reference computer.

You plan to deploy the image to several client computers.

You need to meet the following requirements for the planned deployment:

Remove all of the unique system information from the image. Display the Windows Welcome screen the first time a new computer starts.

Which command should you run?

A. sysprep /audit /generalize /reboot

B. sysprep /oobe /generalize /shutdown

C. sysprep /audit /oobe /generalize

D. sysprep /generalize /quiet /reboot

Correct Answer: B

QUESTION 4

A customer plans to deploy Windows Server 2012 Standard to several servers.

The customer identifies the following hardware requirements for the planned deployment:

Must support three volumes in a single mirror without the installation of third-party managementsoftware.

Must support NIC teaming without the installation of third-party management software.

Must be able to back up the server data to a tape device.

Must be able to run on an x86 hardware platform.

You need to identify which two requirements are met by the planned deployment of Windows Server 2012.

Which two requirements should you identify? (Each correct answer presents part of the solution. Choose two.)

A.

Must support three-way mirrors without the installation of third-party management software.

B.

Must support NIC teaming without the installation of third-party management software.

C.

Must be able to run on an x86 hardware platform.

D.

Must be able to back up the server data to a tape device.

Correct Answer: AB

QUESTION 5

You have a server that has the Windows Deployment Services server role installed. Windows Deployment Services (WDS) has an image group that contains several Windows 8 images.

You need to ensure that the company name and the support phone number of the OEM are con- figured when the image is deployed to a computer.

Which file should you modify?

A. Unattend.xml

B. Startnet.cmd

C. Sysprep.inf

D. Winpeshl.ini

Correct Answer: A
