QUESTION 1

How is peer affinity reset in the CLI for an Interceptor appliance cluster?

- A. "peer affinity reset" on all Interceptors
- B. "neighbor reset" on all Steelheads
- C. "service restart" on all Interceptors
- D. "neighbor reset" on all Interceptors

Correct Answer: C

QUESTION 2

What is visible on the CMC appliance home page dashboard? (Select 4)

- A. CMC appliance model
- B. CMC appliance version
- C. Logout
- D. Reset
- E. User Logged in

Correct Answer: ABCE

QUESTION 3

A customer's network consists of a data center with an Interceptor appliance and a Steelhead appliance cluster and several remote sites each with Steelhead appliances. You would like to pass-through an application unoptimized due to a suspected problem and are provided the following information: The application uses a static TCP port, 15000. The application is initiated from the remote site machines. The same servers which host the application host several other applications as well. Based on the information provided which option will allow the application to pass-through:

- A. Configure in-path rules on the Interceptor appliance to pass-through destination TCP port 15000
- B. Configure in-path rules on the data center Steelhead appliances to pass-through the server IP addresses
- C. Configure a peering rule on the Interceptor appliance to pass-through destination TCP port 15000
- D. Configure a load-balancing rule on the Interceptor appliance to pass-through destination TCP port 15000
- E. Stop the Interceptor appliance service

Correct Answer: D

QUESTION 4

What should you do when you receive the following message?

```
[mgp]server WARN] 23355 [10.36.18.115:1712 -> 10.14.17.809] Resetting.
```

- A. Nothing. This is a warning message which means that the Steelhead appliance is resetting an internal state regarding this connection and it should not affect user performance.
- B. Switch off the Steelhead appliance
- C. Create a specific pass-through rule to bypass the above source and destination hosts
- D. Reload the Steelhead appliance

Correct Answer: A

QUESTION 5

WCCP protocol has a methodology of load balancing with two or more Steelhead appliances. What are the maximum number of buckets able to be used for the MASK assignment?

- B. 32
- C. 64
- D. 128
- E. 256

Correct Answer: D
