QUESTION 1

An application presents the user with a graphical interface. The interface includes buttons that the user clicks to perform tasks. Each time the user clicks a button, a method is called that corresponds to that button. Which term is used to describe this programming model?

A. Event driven

B. Structured

C. Service oriented

D. Functional

Correct Answer: A

QUESTION 2

You need to allow a consumer of a class to modify a private data member.

What should you do?

A. Provide a public function that assigns a value to the data member.

B. Create global variables in the class.

C. Assign a value directly to the data member.

D. Provide a private function that assigns a value to the data member.

Correct Answer: A

In this example (see below), the Employee class contains two private data members, name and salary. As private members, they cannot be accessed except by member methods. Public methods named GetName and Salary are added to

allow controlled access to the private members. The name member is accessed by way of a public method, and the salary member is accessed by way of a public read-only property.

Note: The private keyword is a member access modifier. Private access is the least permissive access level. Private members are accessible only within the body of the class or the struct in which they are declared

Example:

class Employee2

{

private string name = "FirstName, LastName";

private double salary = 100.0;

public string GetName()

```
{

return name;

}

public double Salary

{

get { return salary; }

}

}
```

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

When creating a site to utilize message queuing, the IP address must be configured to MSMQ.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

A. No change is needed

B. protocol

C. host header

D. port

Correct Answer: B

QUESTION 4

You run the following code.

```
Dim beakerFull As Boolean = True
Dim flameOn As Boolean = False
Dim iResult As Integer

Select Case beakerFull
  Case True
    Select Case flameOn
      Case True
        iResult = 4
      Case False
        iResult = 3
    End Select
  Case False
  Case flameOn
  Case False
    iResult = 2
  Case True
    iResult = 1
End Select
```

What will the value of the variable iResult be?

A. 1

B. 2

C. 3

D. 4

Correct Answer: C

QUESTION 5

You are designing a Windows Store application.

You need to design the application so that users can share content by connecting two or more devices by physically tapping the devices together. Which user experience (UX) guideline for Windows Store applications should you use?

A. Share and data exchange

B. location-awareness

C. device-awareness D. proximity gestures

Correct Answer: A
