QUESTION 1

You are creating a variable for an application.

You need to store data that has the following characteristics in this variable:

Consists of numbers and characters

Includes numbers that have decimal points Which data type should you use?

A.

String

B.

Float

C.

Char

D.

Decimal

Correct Answer: A

Need a string to store characters.

QUESTION 2

Which term is used to describe small units of text that are stored on a client computer and retrieved to maintain state?

A. trace

B. cross-page post

C. cookie

D. server transfer

Correct Answer: C

HTTP is a stateless protocol. This means that user data is not persisted from one Web page to the next in a Web site. One way to maintain state is through the use of cookies. Cookies store a set of user specific information, such as a reference identifier for a database record that holds customer information.

QUESTION 3

What does the Console.Error property do within a console-based application?

- A. sets the standard error input stream
- B. gets the standard error output stream
- C. gets the standard error input stream
- D. sets the standard error output stream

Correct Answer: D

QUESTION 4

Which language allows you to dynamically create content on the client side?

- A. Cascading Style Sheets (CSS)
- B. JavaScript (JS)
- C. Extensible Markup Language (XML)
- D. Hypertext Markup Language (HTML)

Correct Answer: B

JavaScript (JS) is a dynamic computer programming language. It is most commonly used as part of web browsers, whose implementations allow client-side scripts to interact with the user, control the browser, communicate asynchronously, and alter the document content that is displayed.

QUESTION 5

You execute the following code.

```
Dim beakerFull As Boolean = True
Dim flameOn As Boolean = False
Dim iResult As Integer

Select Case beakerFull
    Case True
        Select Case flameOn
            Case True
                iResult = 1
            Case False
                iResult = 2
        End Select
    Case False
        Select Case flameOn
            Case False
                iResult = 3
            Case True
                iResult = 4
        End Select
End Select
```

What will the variable result be?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: B
