QUESTION 1

A Windows Forms application uses forms that are inherited from a base form. A new control must appear on all of the forms.

You add the new control to one of the inherited forms, and you rebuild the application. You discover that none of the other inherited form contain the new control.

You need to ensure that the new control appears on all of the forms.

What should you do?

- A. Add the control to the Visual Studio Toolbox.
- B. Move the control to the base form, and rebuild the application.
- C. Rebuild all forms except the form that has the new control.
- D. Rebuild the form that has the new control, and rebuild the application.

Correct Answer: B

QUESTION 2

A Windows Forms form contains a ListBox control. The ListBox control is databound to a data source. The data in the data source is not sorted. When you set the Sorted property of the ListBox control to true:
