QUESTION 1

You need to install a Windows Services application manually. Which command-line utility should you use?

- A. installutil.exe
- B. installservice.exe
- C. regasm.exe
- D. regsvr32.exe

Correct Answer: B

QUESTION 2

A Windows Forms form contains a ListBox control.

During run time, you bind the control to a data source. You then add records to the data source.

Which items will the ListBox contain?

- A. Only the new items
- B. Two copies of the original items and one copy of the new items
- C. Only the original items
- D. The original items and the new items

Correct Answer: C

QUESTION 3

You are creating a solution that includes projects named ProjectA and ProjectB. You need to ensure that you can access classes in ProjectB from ProjectA. What should you do?

- A. Set the IsReferenceable property of ProjectB to true.
- B. Add ProjectB as a reference in ProjectA.
- C. Add ProjectA as a reference in ProjectB.
- D. Set the References property of ProjectA to ProjectB.

Correct Answer: B

QUESTION 4

A Windows Forms application uses forms that are inherited from a base form. A new control must appear on all of the forms.

You add the new control to one of the inherited forms, and you rebuild the application. You discover that none of the other inherited form contain the new control.

You need to ensure that the new control appears on all of the forms.

What should you do?

- A. Add the control to the Visual Studio Toolbox.
- B. Move the control to the base form, and rebuild the application.
- C. Rebuild all forms except the form that has the new control.
- D. Rebuild the form that has the new control, and rebuild the application.

Correct Answer: B

QUESTION 5

A Windows Service has a Manual startup type.

The service will run only:

- A. After a user logs on.
- B. When the service is called from another service or application.
- C. When the computer restarts.
- D. After the startup type is changed to Automatic.

Correct Answer: D
