QUESTION 1

Which of the following technologies is considered a network attached storage protocol?

- A. NFS
- B. FCoE
- C. Fiber Channel
- D. iSCSI

Correct Answer: A

NFS (Network File System) is considered a network attached storage protocol. It is used to enable communication between an NFS client and an NFS server. The NFS client that is built into ESX supports in accessing the NFS server and in

using NFS volumes for storage.

Incorrect Answers:

B, C, D: These are all considered block storage protocols.

QUESTION 2

What service replicates information of every object in a tree and forest so that you can quickly find those objects?

- A. LDAP server
- B. global catalog
- C. Infrastructure Master
- D. PDC Emulator

Correct Answer: B

A global catalog replicates the information of every object in a tree and forest. However, rather than store the entire object, it stores just those attributes that are most frequently used in search operations, such as a user's first and last name, computer name, and so forth. By default, a global catalog is created automatically on the first domain controller in the forest, but any domain controller can be made into a global catalog.

QUESTION 3

You use group policy to manage users and computers in your Active Directory Domain Services (AD DS) domain. All domain controllers run Windows Server 2016.

You need to see what effect the applied group policies are having on an individual computer.

What should you use?

- A. Local Users and Groups
- B. Resultant Set of Policy
- C. Local Security Policy
- D. Effective Permissions

Correct Answer: B

If you would like to find out what group policy settings are applied to a user, you can use Resultant Set of Policy. You'll find this tool in the Group Policy Management Console. This tool evaluates all the group policies that apply to the user and lists the resultant settings that are applied from the group policies.

QUESTION 4

Which DNS resource record is used to locate a domain controller?

- A. SOA
- B. A
- C. PTR
- D. SRV

Correct Answer: D

SRV (service) records locate servers that host particular services, including LDAP servers or domain controllers.

QUESTION 5

You want to view summary information about server performance and resource use. Which tool should you use?

- A. Event Viewer
- B. Resource Monitor
- C. System Configuration
- D. System Information

Correct Answer: B
