### QUESTION 1

Your sister is taking a video editing class at school. She purchased a 2-TB USB hard drive to store video files. She wants to connect it to her Windows 8.1 computer at home and to a Mac OSX 10.3 computer at school. Video file will exceed 5

GB in size.

You need to prepare a new hard drive by formatting it with the appropriate file system.

Which file system should you choose?

- A. FAT
- B. ReFS
- C. NTFS
- D. FAT32

Correct Answer: C

Mac OSX 10.3 supports NTFS.

NTFS supports large files well above 5 GB.

Incorrect answers:

Not A: FAT does not support a 5 GB file size.

Not B: ReFS is only supported by Microsoft Windows.

Not C:

Not D: FAT32 works fine if file sizes are smaller than 4GB.

### QUESTION 3

When you copy a file from one NTFS file system partition to a different NTFS partition, what happens to the file permissions of the copied file?

- A. They are the combined permissions of the original file and destination folder
- B. They inherit the permissions of the destination folder
- C. They remain the same as the original
- D. They are removed, and only the creator is given full control

Correct Answer: B

When you copy a protected file to a folder on the same, or a different volume, it inherits the permissions of the target directory.

#### QUESTION 4

Your company is deploying a new application on employee\\s personal Windows RT devices. The devices are registered with Microsoft Intune. You need to publish the new application to Microsoft Intune cloud storage so that the employees

can install the published application.

What are requirements of the published installation files?

- A. In order to publish the files, Internet speed must be at least 50 kbps
- B. The cumulative total file size for the published applications must be smaller than 2 GB
- C. In order to upload the software, the files must be a .zip format
- D. As many files as necessary may be uploaded, but no single file may be larger than 2 GB

Correct Answer: D

Before you publish computer apps to Microsoft Intune cloud storage make sure no single file size is larger than 2 GB.

Reference: Deploy apps to computers in Microsoft Intune <https://technet.microsoft.com/en-us/library/dn646961.aspx>

---

#### QUESTION 5

Your company uses Windows 10 Work Folders on personal devices. The devices are all registered in Microsoft Intune.

You need to enforce the following security requirements on the personal devices:

Company data can be removed if an employee is terminated. Company data cannot be accessed if a device is lost or stolen.

What should you do?

- A. Enable selective wipe, and enforce a lock screen and password
- B. Enable selective wipe, and secure files transfers with SSL
- C. Enable selective wipe, and enforce encryption
- D. Enforce encryption and enforce a lock screen and password

Correct Answer: C

\*

Microsoft Intune provides selective wipe, full wipe, remote lock, and passcode reset capabilities. A selective wipe to remove only company data.

\*

Encryption on Mobile Devices can be managed with Configuration Manager and Intune

Reference: Help protect your data with remote wipe, remote lock, or passcode reset using Microsoft Intune
