QUESTION 1

What are two ways to lower the risk of a virus or malware infection? Choose two.

- A. Enable the Windows firewall
- B. Use only HTTPS while web surfing
- C. Keep the system updated
- D. Install a download manager

Correct Answer: AC

QUESTION 2

This question requires that you evaluate the underlined text to determine if it is correct.

You are setting up your home network. All devices on your home network connect through a wireless access point.

To share media files between your computer running Windows 10 and your video game system, you should create a public network.

Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. an extranet
- C. a VPN connection
- D. a private network

Correct Answer: D

QUESTION 3

You are tracking hardware and software inventory on various devices.

You need to identify the requirements to support communication between the devices and the Microsoft Intune administrative console.

Which device requirement must be met?

- A. All devices must be domain members
- B. Windows computers must run Windows 8.1 or later

- C. Microsoft Intune agent must be installed
- D. All enrolled devices must be in the same organizational unit (OU)

Correct Answer: C

The devices need the Microsoft Intune client installed. This software is also known as Microsoft Intune agent.

QUESTION 4

This question requires that you evaluate the underlined text to determine if it is correct.

In order to install Microsoft Intune client software on a computer, you need to be a member of that computer's "Administrators" group. Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If

the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. Remote Management users
- C. Power users
- D. Remote Desktop users

Correct Answer: A

The account that installs the Intune client software must have local administrator permissions to that computer.

QUESTION 5

You manage 200 desktop computers at your school's main computer lab. The computers run Microsoft Windows 10.

A critical update was released.

You need to determine if the update was installed on one of the computers in the lab. What should you do?

- A. View the Event Viewer Security log
- B. Check System Status in Control Panel
- C. View Windows update history
- D. Go to the System Action Center

Correct Answer: C

Follow these steps to see which Windows updates are installed on your computer.

1.

Open Windows Update by clicking the Start button Picture of the Start button. In the search box, type Update, and then, in the list of results, click Windows Update.

2.

In the left pane, click View update history.
