QUESTION 1

Your company needs a service that eliminates a single point of failure on any provisioned service.

Which feature can Microsoft Azure offer to lower the probability of a failure that disrupts business operations?

- A. HDInsight
- B. scalability
- C. high availability
- D. backup

Correct Answer: C

A highly available cloud application implements strategies to absorb the outage of the dependencies like the managed services offered by the cloud platform. Despite possible failures of the cloud platform's capabilities, this approach permits

the application to continue to exhibit the expected functional and non-functional systemic characteristics.

Incorrect answers:

Not A: Azure HDInsight deploys and provisions Apache Hadoop clusters in the cloud, providing a software framework designed to manage, analyze, and report on big data with high reliability and availability.

QUESTION 2

This question requires that you evaluate the underlined text to determine if it is correct.

You have a Windows 10 computer that is part of a workgroup. To share the C:\Work folder from the computer and make it available to offline users, you need to use the public share option.

Review the underlined text, if it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. advanced
- C. HomeGroup
- D. basic

Correct Answer: B

QUESTION 3

Match each type of malware to its definition.

To answer, drag the appropriate malware type from the column on the left to the definition on the right. Each malware type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Malware type	Answer Area
Virus	tracks a user's computer usage
Spyware	sends copies of itself to other machines
Worm	spreads when an executable is initiated by a user

Correct Answer:

Malware type	Answer Area
	tracks a user's computer usage
	sends copies of itself to other machines
	spreads when an executable is initiated by a user

QUESTION 4

Your parents want you to help them protect a tax return file that is on their computer. You use BitLocker to encrypt the hard drive that contains the file. You then make a backup copy of the file. What will occur if you attempt to copy the backup copy to a USB flash drive?

- A. The backup copy will remain encrypted
- B. BitLocker will encrypt the USB flash drive

C. BitLocker will prevent you from moving the file

D. The backup copy will be decrypted

Correct Answer: A
