QUESTION 2

Your company needs a service that eliminates a single point of failure on any provisioned service.

Which feature can Microsoft Azure offer to lower the probability of a failure that disrupts business operations?

- A. HDInsight
- B. scalability
- C. high availability
- D. backup

Correct Answer: C

A highly available cloud application implements strategies to absorb the outage of the dependencies like the managed services offered by the cloud platform. Despite possible failures of the cloud platform's capabilities, this approach permits

the application to continue to exhibit the expected functional and non-functional systemic characteristics.

Incorrect answers:

Not A: Azure HDInsight deploys and provisions Apache Hadoop clusters in the cloud, providing a software framework designed to manage, analyze, and report on big data with high reliability and availability.

QUESTION 4

You manage 200 desktop computers at your school's main computer lab. The computers run Microsoft Windows 10.

A critical update was released.

You need to determine if the update was installed on one of the computers in the lab. What should you do?

- A. View the Event Viewer Security log
- B. Check System Status in Control Panel
- C. View Windows update history
- D. Go to the System Action Center

Correct Answer: C

Follow these steps to see which Windows updates are installed on your computer.

1.

Open Windows Update by clicking the Start button Picture of the Start button. In the search box, type Update, and then, in the list of results, click Windows Update.

2.

In the left pane, click View update history.
