QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

You need to ensure that an installation of the Microsoft Intune client displays messages during the installation process. You should run "Windows Intune Setup.exe/PrepareEnroll" from an elevated command prompt.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. Windows_Intune_Setup.exe
- C. Windows_Intune_Setup.exe/Extract
- D. Windows_Intune_Setup.exe/Quiet

Correct Answer: B

Just use Windows_Intune_Setup.exe without any arguments and all the client messages will be displayed.

Incorrect answers:

Not A: There is a command line switch that can be used to schedule a task that will attempt to enroll the computer at a later time. This will ensure that the computer image is not enrolled before it has been deployed to the target computer. To

launch a delayed installation use the following command line argument to launch the installation:

```
Windows_Intune_Setup.exe /PrepareEnroll
```

Not C: You can use the Windows_Intune_Setup.exe /Extract command line argument on the Windows_Intune_Setup.exe file to extract both a 32 bit and 64 bit MSI package. Not D: You can use the Windows_Intune_Setup.exe/ Quiet

argument if you wish to suppress the Installation wizard and run it with no user interaction.

QUESTION 2

This question requires that you evaluate the underlined text to determine if it is correct.

Cloud Infrastructure as a Service (IaaS) allows the consumer to deploy consumer-acquired applications that are created by using programming languages and tools that the provider supports.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. Backend as a Service (BaaS)

- B. No change is needed.
- C. Platform as a Service (PaaS)
- D. Software as a Service (SaaS)

Correct Answer: C

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct. You are an IT intern assigned to implement Microsoft Office 365 and Microsoft Intune.

You have not created any Intune policies. You want to control endpoint protection, software updates, and a policy check schedule for a group of devices.

You must deploy a mobile device security policy template.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. Windows Firewall Settings
- C. Microsoft Intune Agent Settings
- D. Microsoft Intune Center Settings

Correct Answer: A

Microsoft Intune Policies are groups of settings that control features on mobile devices and computers. You create policies using templates that contain recommended or customized settings, and then deploy them to device or user groups.

QUESTION 4

You are an intern for a company that has all of its hardware and software on-site. Due to a severe storm, the company did not have power for several days, and important data was lost.

How should this problem best have been avoided?

- A. by providing greater storage capacity
- B. by distributing component services across multiple systems
- C. by providing physical and data redundancy
- D. by allowing for more scalability

Correct Answer: B

QUESTION 5

You are preparing to add your domain to Microsoft Office 365.

You need to define how you will use your domain by selecting Microsoft Exchange Online, Skype for Business Online, or a combination of these.

What is the name of this step in the setup process?

- A. domain purpose
- B. domain registration
- C. DNS registration
- D. DNS zone delegation

Correct Answer: A
