QUESTION 5

You have created a table in your InDesign document. You want to paste a graphic in a cell of the table. To accomplish this task you have selected the cell by pressing Esc key and then pasted the graphic.

What will happen?

A. The cell will be eliminated from the table.

B. The graphic will be pasted in the more than one cell in the table.

C. The graphic will not be pasted in the cell.

D. The graphic will be pasted in the cell.

Correct Answer: C

You should place a graphic in a table cell in exactly the same way as you insert a graphic in text. Click the Type tool in a cell, or select some text inside a cell, then place a file or paste a graphic that you copied to the Clipboard. You must select text or have an active text insertion point because selecting the cell itself will not get the graphic into the cell. In the above scenario you selected only the cell and not the text inside the cell; this is why graphic is not pasted in the table cell.
