QUESTION 1

Andy works as a Web developer for company Inc. He has created a Web page using InDesign CS5 with an extensive amount of information. He wants to use links for the convenience of the users of his Website so that they can directly get to a particular section on the current Web page.

Which of the following panels will Andy use to accomplish this task?

A. Links panel

B. Pages panel

C. Preflight panel

D. Hyperlinks panel

Correct Answer: D

The Hyperlinks panel is a feature of InDesign CS5 which is used to create hyperlinks in a document so that when a user exports to Adobe PDF or SWF in InDesign, a viewer can click a link to jump to other locations in the same document, to other documents, or to websites. To open the Hyperlinks panel in InDesign CS5, use one of the following steps: Choose Window > Interactive > Hyperlinks. Choose Window > Type and Tables > Cross-References.

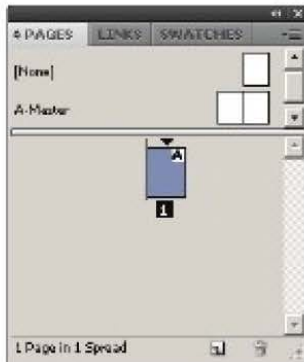

Answer option A is incorrect. The Links panel is a feature of InDesign where all the files are listed and placed in a document. These include both local (on disk) files and assets that are managed on a server. However, the files that are pasted from a website in Internet Explorer are not displayed in this panel. The Links panel is shown in the image below:

Answer option B is incorrect. The Pages panel is used in InDesign to work with document pages as well as master pages. It allows a user to create pages,
which can be blank pages or based on a master page. These pages can be moved, copied, and deleted, as well as for retrospectively applying a master. The Pages panel also provides an excellent method to navigate through longer documents. To open the Pages panel, choose Window > Pages, or press Control+F12 on the keyboard. The Pages panel is shown in the image below:

Answer option C is incorrect. The Preflight panel is a feature of InDesign CS5 that warns of the problems that could prevent a document or book from printing or outputting as expected while a document is being edited. These problems include missing files or fonts, low-resolution images, overset text, and a number of other conditions.

The preflight settings can be configured to define which conditions are detected. These preflight settings are stored in preflight profiles for easy reuse. To open the Preflight panel, choose Window > Output > Preflight, and double-click the Preflight icon at the bottom of the document window. The Preflight icon is green if no errors are detected or red if errors are detected. The Preflight panel is shown in the image below:

QUESTION 2

Which of the following options will you use to prevent selected text from breaking across a line?

A. Nonbreaking space

B. No Break

C. Hyphenation Settings

D. Discretionary hyphens

Correct Answer: B

Choose No Break option from the Character panel menu to prevent selected text from breaking across a line.

Answer: D is incorrect. Discretionary hyphens option prevents the common typographic problem of hyphenated words.

Answer: A is incorrect. Nonbreaking space option is used between words you want to keep together.

Answer: C is incorrect. Hyphenation Settings can be chosen from the Paragraph panel menu to change hyphenation settings.
