QUESTION 1

Which is a difference between an OSGI bundle and a Java package?

- A. None. You can install and activate any java package in an OSGI container
- B. A jar file cannot be inside an OSGI Bundle
- C. The bundle contains extra metadata defined in a MANIFEST.MF file
- D. The bundle package structure is completely different than the one of a .jar file

Correct Answer: C

QUESTION 2

You are working with two components: Component A and Component B. Component B has a slightly different behavior than component A. What is the best way to reuse the default script of component A in component B?

- A. Set a property in component B called sling:resourceSuperType with the path to component A and omit the default script in component B
- B. Set a property in component B called sling:resourceSuperType with the path to component A and create an empty default script in component B
- C. Set a property in component B called sling:resourceSuperType with the path to component A and include the default script of component A in the default script in component B
- D. Copy the default script from component A into component B

Correct Answer: A

QUESTION 3

You want to override an OSGi component configuration in CRX. What happens if you do NOT specify a property in the CRX configuration that is required by the component?

- A. It will use the default configuration for the unspecified property.
- B. You will get an exception when the component script tries to access the property.
- C. The complete CRX configuration will be ignored and the Felix Console configuration will be used instead.
- D. CRX will not let you save the configuration node until you define all the required parameters for that component.

Correct Answer: A

QUESTION 4

Which flag should you set when you configure the mod_rewrite rules of the Apache Web server when you are including the CQ Dispatcher module?

- A. \G flag to force the server to return a 410 Gone status with the response.
- B. PT flag to send the original request through to processing pipeline for the Dispatcher to respond.
- C. R flag to force all the requests to be redirected to the location specified in the rewrite rule.
- D. T flag to set the MIME type for all the HTTP responses.

Correct Answer: B

QUESTION 5

How do you specify dependencies for your CQ HTML client library?

- A. Add a multivalue property called dependencies to the client library root node, containing the value of the dependent client libraries categories.
- B. In the js.txt file specify the path to the client library folder where the dependent files are located.
- C. Add a multivalue property called dependencies to the template definition containing the value of the dependent client libraries root path.
- D. Specify the dependencies as path attributes in the tag.

Correct Answer: A
