QUESTION 1

How does Boot Camp Assistant prepare a Mac OS X v10.6 computer for Windows installation?

A. It reformats the target hard disk as a FAT32 volume, then modifies the hard disk to act as a Windows startup disk.

B. It does not modify the target hard disk, but creates a disk image at the root of the target hard disk, and formats the disk image as a Windows volume.

C. It initializes the target hard disk with two partitions, and formats one partition as a Mac OS Extended (Journaled) volume, and the other as a Windows volume.

D. It resizes an existing partition on the target hard disk as needed, then creates a new partition on the hard disk, and formats the new partition as a Windows volume.

Correct Answer: D

QUESTION 2

Which three issues can occur when multiple users are logged via fast user switching?

Choose three.

A. Peripherals in use by one user\\'s application may be inaccessible to other users.

B. Some applications may run out of memory due to the number of processes running.

C. iTunes librairies cannot be shared between users who are logged at the same time.

D. Some applications may fail to open for one user if they are already open in another user\\'s account.

E. Access to some services may be granted inappropriately to users who log in after certificates have been validated.

F. Changes to documents that are open in multiple users account may not be able to be saved by some of the users.

G. Display resolution preferences may conflict, and cause resolution not to change appropriately when new users log in.

Correct Answer: ADF

QUESTION 3
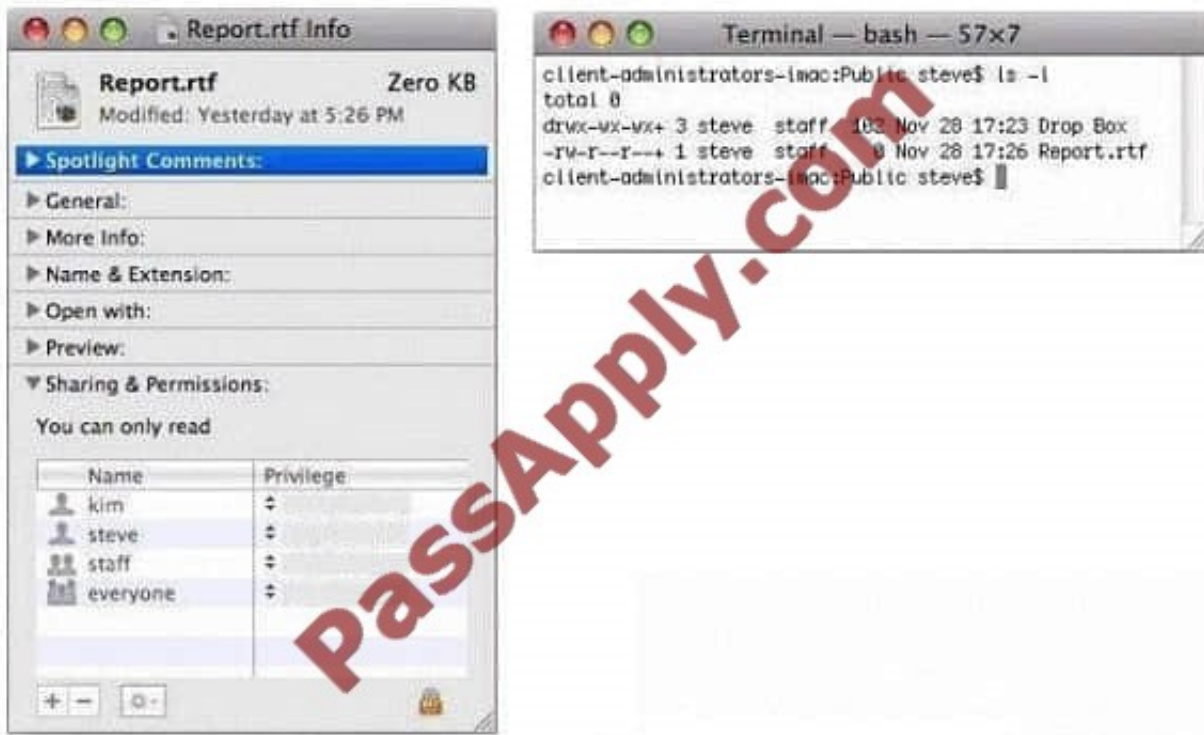

What does setting the sticky bit on a folder in Mac OS X do?

A. It makes invisible files inside the folder visible.

B. It protects files in user home folders from being moved by other users.

C. It allows users to delete files that were moved to the folder by another user.

D. It prevents users from deleting files from the folder if the files are owned by another user.

Correct Answer: D

QUESTION 4

Review the screenshots of a file\\'s permissions, as seen in Finder and from Terminal, and then answer the question below.

NOTE: The specific privileges identified in the Info window below have been deliberately blurred, as they are not relevant to this question. Why are Kim\\'s permissions to the file, Report.rtf, NOT visible in the Terminal listing?

A. Kim\\'s permissions are stored as POSIX settings.

B. Kim\\'s permissions are stored in the volume catalog.

C. Kim\\'s permissions are stored in the file data segment.

D. Kim\\'s permissions are stored in an Access Control List (ACL).

Correct Answer: D

QUESTION 5

You enter the command rm -R /Applications/Exec.app in the default shell in a Mac OS X Terminal window. What role does the string "/Applications/Exec.app" play in this command?

A. A flag that redirects the command

B. A switch that modifies the argument

C. An option that modifies the command

D. The command that the shell executes

E. The argument that the command acts on

Correct Answer: E
