QUESTION 1

A digital publisher is migrating to AEM. The primary goal is to provide a more user-friendly page authoring interface. The current content management system has been built in house by staff developers, runs on a top of a MySQL database, and uses forms for content editing. Discovery meetings are being held with the business owners and content authors. What is the most significant and relevant conceptual change from the current CMS?

- A. AEM uses a hierarchy-based repository.
- B. AEM does NOT use a relational database.
- C. AEM allows authors to drag-and-drop components to build pages.
- D. AEM is written in Java.

Correct Answer: C

QUESTION 2

A customer is introducing blog and forum functionality. To handle the moderation of data between the publisher and author instances, the customer needs to add reverse replication agents. The architect must create documentation based on a proposed solution architecture.

Which two architectural diagrams should the architect modify?

- A. Logical
- B. Physical
- C. Conceptual
- D. Data Flow

Correct Answer: AD

QUESTION 3

Which three tasks can users achieve with AEM Dispatcher? (Choose three.)

- A. Provide load balancing
- B. Poll AEM for content invalidation
- C. Secure AEM application
- D. Cache HTML content

Correct Answer: ACD

QUESTION 4

A small public sector organization needs help planning the architectural design of its AEM system. The reorganization's few staff members resist learning new technologies.

What is the most important factor for the architect to consider while planning the system design?

- A. Performance
- B. Usability
- C. High Availability
- D. Extensibility
- E. Low Maintenance

Correct Answer: C

QUESTION 5

During discovery of business requirements, an architect learns that some of the business requirements cannot be accomplished using standard out-of-the-box AEM components.

Which requirement can be achieved with out-of-the-box components?

- A. Display the current temperature for a given location
- B. Create an image carousel from a user-selected number of pages
- C. Display a Google Maps interactive map for an authored location
- D. Display the top X requested pages in a site

Correct Answer: C
