**QUESTION 1**

In the screenshot, click the icon of the preference pane where you configure your Mac to access mail provided by an Exchange server.

Hot Area:

Correct Answer:

**QUESTION 2**

In the context of computers on a network, what does "bind" mean?

- A. To configure a computer to connect to a directory server
- B. To configure a computer to prevent it from accessing data on the network
- C. To configure a firewall on a computer to restrict inbound traffic
- D. To configure a computer to connect to a network

Correct Answer: A

QUESTION 3

Which statement accurately describes the role of FileVault?

- A. FileVault encrypts the startup disk's contents.

- B. FileVault keeps a journal that tracks all changes to a user's files.
- C. FileVault stores a user's home folder as an encrypted disk image.
- D. FileVault backs up a user's data to a specified volume on a specified schedule.

Correct Answer: A

QUESTION 4

Which statement about FileVault is true?

- A. You can enable FileVault only for admin user accounts.
- B. You must authenticate as an admin user to turn on FileVault.
- C. You can turn off FileVault by starting up the Mac in a single-user mode and entering the Master Password at the prompt.
- D. If you lose the admin user password for a Mac that has FileVault turned on, you can retrieve its user data by restarting the Mac in Target Disk Mode.

Correct Answer: B

QUESTION 5

What is the role of POP in email transactions?

- A. POP translates IP addresses into domain names, and vice versa.
- B. POP lets mail clients retrieve email from the mail server.
- C. POP transfers outgoing email from the sender's mail server to the recipient's mail server.
- D. POP provides user account information, including the email address associated with a particular user account.

Correct Answer: B
