QUESTION 1

Review the screenshot then answer the question below.

You have a Mac with the user accounts shown in the screenshot. To configure the Mac to connect to an Active Directory server, you must authenticate as which user?

- A. Chris
- B. Carla
- C. Sam
- D. Bob

Correct Answer: A

QUESTION 2

Which technology does Messages use for video chats?

- A. Pixlet
- B. H.264
- C. DVCPPro
- D. MPEG IMX

Correct Answer: B

QUESTION 3

In the screenshot, click the icon of the preference pane where you configure your Mac to access mail provided by an Exchange server.

Hot Area:

Correct Answer:

QUESTION 4

You want to run a Windows-based application on a Mac. Which of these is a valid reason to use Boot Camp rather than a virtual solution like Parallels or VMware Fusion?

- A. You can buy Boot Camp on the App Store for \$9.99, which is less expensive than the virtual solutions.
- B. Boot Camp runs natively without hardware-resource contention on Mac computers, so you'll see better overall performance with Boot Camp than with virtual solutions.
- C. Boot Camp doesn't require you to buy and install Windows to run Windows based applications, whereas virtual solutions do.
- D. You can use Boot Camp to switch between OS X and Windows applications instantly, whereas virtual solutions require you to restart your Mac to switch between the two environments.

Correct Answer: B

QUESTION 5

Which statement accurately describes the role of FileVault?

- A. FileVault encrypts the startup disk's contents.
- B. FileVault keeps a journal that tracks all changes to a user's files.
- C. FileVault stores a user's home folder as an encrypted disk image.
- D. FileVault backs up a user's data to a specified volume on a specified schedule.

Correct Answer: A
