Correct Answer: A

---

#### QUESTION 3

Using Server app, you are configuring email alerts to be sent to an OS X Server system administrator.

Which TWO of these server events can you set to trigger an alert? (Select 2)

- A. A user has exceeded his or her assigned disk quota for file sharing.
- B. New software updates are available for the server.
- C. An unsuccessful attempt was made to log in with the root account.
- D. A certificate has expired or is about to expire.
- E. The number of files on the server has exceeded a specified number.

Correct Answer: AB

---

#### QUESTION 4

Why is the "Include directory contacts in search" option dimmed?

- A. The server is neither configured as an Open Directory Master nor bound to a directory server.
- B. The data folder for the Contacts service is empty.
- C. The folder containing the Contacts data is not configured as a share point.
- D. The Websites service is not turned on.

Correct Answer: A

---

#### QUESTION 5

You configured the Time Machine service on a computer with OS X Server to store backup data on the Data volume. Later you configure the service to store the backup data on a larger volume named Backup Data.

How is the backup data handled after the switch to the new backup volume?

- A. The next time users back up, new and changed files are backed up to the new volume, along with aliases pointing to the data on the old volume.
- B. The next time users back up, all their files are backed up to the new volume.
- C. Users are presented with a dialog asking which volume they want to use to store their backup data.
- D. OS X Server copies the existing backup data from the old volume to the new volume.

Correct Answer: B
