QUESTION 1

Which procedure will permit only the Marketing group to access a website hosted on OS X Server?

- A. Using Server app, double-click the website from the list of websites, add a realm, and enable Allowed Access for the Marketing group.
- B. In Finder, edit the permissions of the site folder to Read-only for the Marketing group, and No Access for the everyone group.
- C. In Finder, edit the permissions of the site folder to Read/Write for the Marketing group, and No Access for the everyone group.
- D. Using Server app, double-click the website from the list of websites, and select the Marketing group from the Who Can Access menu.

Correct Answer: D

QUESTION 2

Two websites are hosted on the same Mavericks computer running OS X Server.

What are THREE ways can you configure the server to differentiate between incoming requests for either website? (Select3)

- A. Configure each site to use a different Apache process.
- B. Create a different .ht access file for each site.
- C. Configure each site to use a different domain name.
- D. Configure each site to use a different socket.
- E. Configure each site to use a different IP address,
- F. Configure each site to use different certificates.
- G. Configure each site to use a different port.

Correct Answer: CEG

QUESTION 3

You are manually restoring the home folder for a new user account, and see the message shown above.

What will happen if you click Cancel?

- A. The existing home folder's name will be changed to match the one you entered in the new account sheet.

- B. You will be returned to the new account sheet in the Users and Group pane.
- C. The account name will be changed to the name of the existing home folder.
- D. The existing home folder will be displayed in the Finder with the name selected.

Correct Answer: B

QUESTION 4

How do you create a new website in OS X Server, without modifying the default website?

- A. In Server app, add a new web service process.
- B. In Finder, create a subfolder in the default website's folder, and add the files for the new website to that folder.
- C. In Server app, add a new website to the list of sites, and specify the folder that contains the files for the new website.
- D. In Server app, duplicate the default website folder, and add a new folder containing the files for the new website

Correct Answer: C

QUESTION 5

What URL should you use on an iOS device to access a WebDAV-enabled share point that is hosted by OS X Server on a Mavericks computer located at server.pretendco.com?

- A. `afp://server.pretendco.com/webdav`
- B. `http://webdav.server.pretendco.com`
- C. `http://server.pretendco.com`
- D. `webdav://server.pretendco.com`

Correct Answer: C
