QUESTION 1

The SAS data set ONE has a variable X on which an index has been created. The data sets ONE and THREE are sorted by X. Which one of the following SAS programs uses the index to select observations from the data set ONE?

A. data two; set three; set one key = X; run;

B. data two; set three key = X; set one; run;

C. data two; set one; set three key = X; run;

D. data two; set three; set one (key = X); run;

Correct Answer: A

QUESTION 2

The SAS data set TEMP has the following distribution of values for variable A:

A Frequency 1 500,000 2 500,000 6 7,000,000 8 3,000

Which one of the following SAS programs requires the least CPU time to be processed?

A. data new; set temp; if a = 8 then b = \\'Small \\'; else if a in(1, 2) then b = \\'Medium\\'; else if a = 6 then b = \\'Large\\'; run;

B. data new; set temp; if a in (1, 2) then b = \\'Medium\\'; else if a = 8 then b = \\'Small\\'; else if a = 6 then b = \\'Large\\'; run;

C. data new; set temp; if a = 6 then b = \\'Large \\'; else if a in (1, 2) then b = \\'Medium\\'; else if a = 8 then b = \\'Small\\'; run;

D. data new;D.data new; set temp; if a = 6 then b = \\'Large \\'; if a in (1, 2) then b = \\'Medium\\'; if a = 8 then b = \\'Small\\'; run;

Correct Answer: C

QUESTION 3

Which one of the following is the purpose of the REUSE= YES option in a compressed SAS data set?

A. It temporarily compresses observations in a SAS data set.

B. It allows users to update the same SAS data set concurrently.

C. It allows new observations to be inserted wherever enough free space exists.

D. It specifies that a new empty data set with a given name replaces an existing data set with the same name.

Correct Answer: C

QUESTION 4

Which one of the following is true regarding the KEEP statement?

A. The KEEP statement is available in both the DATA and the PROC steps.

B. The KEEP statement selects the variables read from the input data set(s).

C. The KEEP statement applies to all data sets created within the same DATA step.

D. The KEEP statement applies only to the first data set created within the same DATA step if more than one data set is created.

Correct Answer: C

QUESTION 5

The following SAS program is submitted:

data one;

do i = 1 to 10;

ptobs = ceil(ranuni(0) * totobs);

set temp point = ptobs

nobs = totobs;

output;

end;

stop;

run;

The SAS data set TEMP contains 2,500,000 observations. Which one of the following represents the possible values for PTOBS?

A. any integer between 1 and 10

B. any real number between 0 and 1

C. any integer between 1 and 2,500,000

D. any real number between 1 and 2,500,000

Correct Answer: C
