QUESTION 1

Within SAS Data Integration Studio, how is the internal code of a SAS Code transformation assigned to its options?

- A. SAS macro variables
- B. columns of SAS datasets
- C. SAS formats
- D. SAS macro calls

Correct Answer: A

QUESTION 2

The ability to deploy a SAS Data Integration Studio job as a Web service or a SAS Stored Process requires additional set up that is performed in which client application?

- A. SAS Data Integration Studio
- B. SAS Enterprise Guide
- C. SAS Job Deployment Studio
- D. SAS Management Console

Correct Answer: D

QUESTION 3

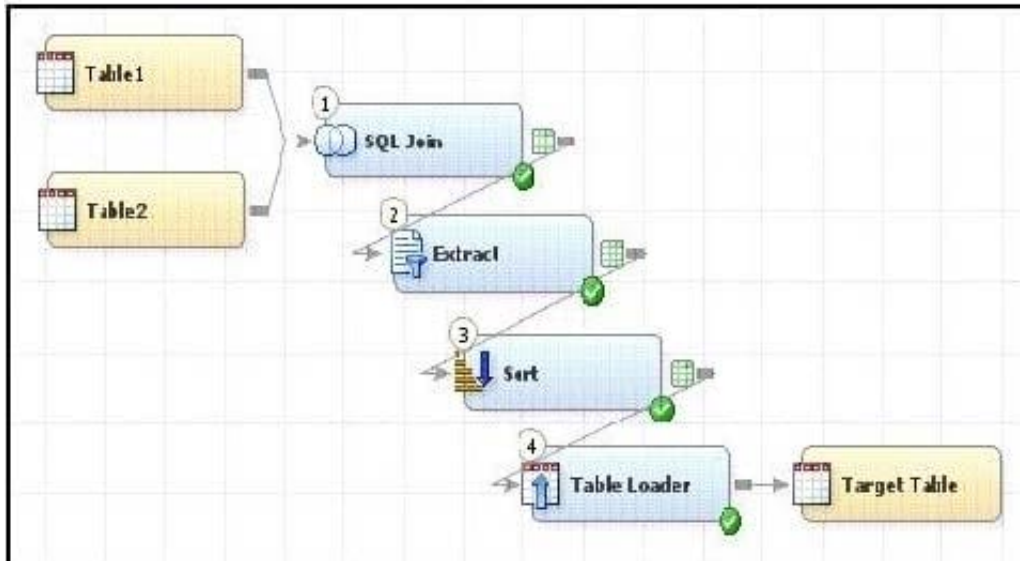

Which statement regarding scheduling SAS Data Integration Studio jobs is true?

- A. To schedule a job flow you must first use SAS Management Console to deploy the job for scheduling.
- B. To schedule the job on the Platform Process Manager you require a dependency generator.
- C. Multiple job flows can be scheduled to a deployment directory.
- D. To schedule a job flow in SAS Management console you must first deploy the job for scheduling using SAS Data Integration Studio.

Correct Answer: D

QUESTION 4

In the following display, can status handling be enabled for the Extract transformation?

- A. No. The Extract transformation does not have a status handling tab in its Properties window, and the Return Code Check transformation can only provide status handling at the job level.
- B. Yes. The Return Code Check transformation can be added to the END of the job flow - the Status Handling tab in the Return Code Check transformation properties can then establish the desired status handling.
- C. No. The Extract transformation does not have a Status Handling tab in its Properties window, therefore it is not possible to establish status handling for this transformation.
- D. Yes. The Return Code Check transformation can be added to the job flow immediately following the Extract - the Status Handling tab in the Return Code Check transformation properties can then establish the desired status handling.

Correct Answer: B

QUESTION 5

In SAS Data Integration Studio, an index can be specified/defined in which location?

- A. the Indexes tab in the properties of a Table Loader transformation
- B. the Indexes tab in the properties of a table metadata object
- C. the Indexes tab in the properties for any transformation
- D. the Indexes tab in the properties of a job metadata object

Correct Answer: B
