**QUESTION 1**

The customer wants to build a SAS OLAP Cube from data stored in separate dimension and a fact table. What type of input would be used to build the customer cube?

- A. Star schema
- B. Detail table
- C. Fully summarized table
- D. Information map

Correct Answer: A

QUESTION 2

A content developer created a filter in SAS Information Map Studio and wants to prevent anyone from selecting the filter in SAS Web Report Studio. How can this be accomplished?

- A. Set Metadata permissions on the filter.
- B. Deny the "View Filters" capability on a SAS Web Report Studio role.
- C. Add the filter as a general prefilter in SAS Information Map Studio.
- D. Select the "Hide from user" option on the filter in SAS Information Map Studio.

Correct Answer: D

QUESTION 3

Refer to the exhibit.

Create New SAS Stored Process Wizard

1 of 5 Name and Description

Save stored process as:

Name:
Stored Process

Location:
[Example: /BIP Tree/My Folder Name] Browse...

Description:

Keywords (comma separated):

More (F1)...

<Back Next> Finish Cancel

A content developer is creating a stored process using the New SAS Stored Process Wizard in SAS Enterprise Guide.

Which information is contained in the location field?

- A. The location of the data source used by the stored process
- B. The location of the SAS Enterprise Guide Project
- C. The location of the metadata for the stored process
- D. The location of the output produced by the stored process

Correct Answer: C

QUESTION 4

A stored process is created from all of the tasks in a SAS Create New Stored Process Wizard?

- A. The code is included from the metadata

- B. The code is included from the process flow
- C. The code is referenced from an external file
- D. The code is written manually

Correct Answer: A

QUESTION 5

Refer to the exhibit and note the error.

The screenshot shows the 'Configure' tab of a SAS BI Dashboard indicator configuration window. The indicator is named 'Orion Star Test'. The data model is 'Orion Star Test' and the display is 'KPI'. Under the 'Display Settings' section, the 'Definition name' is 'Value', the 'Range' is 'Chocolate Enterprises Cases Range', and the 'Gauge type' is 'Dynamic Speedometer'. A warning message indicates 'No values returned. Error occurred generating result set.' Below this message, there are fields for 'Primary' and 'Secondary' data sources, with 'Secondary' currently set to '<None>'.

The data model for this SAS BI Dashboard has been built using a SAS Information Map. What is the reason for the error?

- A. The SAS Information Map used as a data source does not have a measure defined.
- B. The content developer does not have the ReadMetadata permission on the SAS Information Map.
- C. The SAS Information Map was built using an OLAP Cube.
- D. The gauge type for the indicator is not correct and needs to be changed.

Correct Answer: A
