QUESTION 1

A content developer links from a SAS report in SAS Web Report Studio and passes values to another report. What must the receiving report have in order to use the passed value?

- A. a prompted filter based on the received value
- B. a List or Crosstab Report Object
- C. a section for each possible value to be received
- D. a data item of the same name as the value being passed

Correct Answer: A

QUESTION 2

Which component can be added to a Dashboard Object in a SAS BI Dashboard?

- A. Static Label
- B. Range
- C. Dashboard
- D. Dynamic Label

Correct Answer: B

QUESTION 3

An information map has been built from the SASHELP.CLASS and SASHELP.STUDENT tables. A general prefilter had been applied to a data item from the SASHELP.CLASS table. Why should the SASHELP.CLASS table be added as a required table?

- A. It assures that the prefilter will always be applied.
- B. It forces the user to select at least one data item from the required table.
- C. It will improve performance.
- D. Required table data items cannot be removed from the Information Map Content pane.

Correct Answer: A

QUESTION 4

What is the significance of the %STPBEGIN statement? (Choose two.)

- A. Initializes the ODS system
- B. Initiates the prompting for parameters
- C. Processes the user written SAS code
- D. Generates the reserve macro variables

Correct Answer: AD

QUESTION 5

Which of the following is FALSE regarding the Information Maps LIBNAME Engine?

- A. The engine provides read-only access to the data presented by the information map.
- B. The engine is associated with a collection of information maps instead of a physical storage location.
- C. SASIOIME is an alias for the INFOMAPS engine name used in the libname statement.
- D. The engine provides the ability to modify the information map and the underlying data.

Correct Answer: D
