QUESTION 1

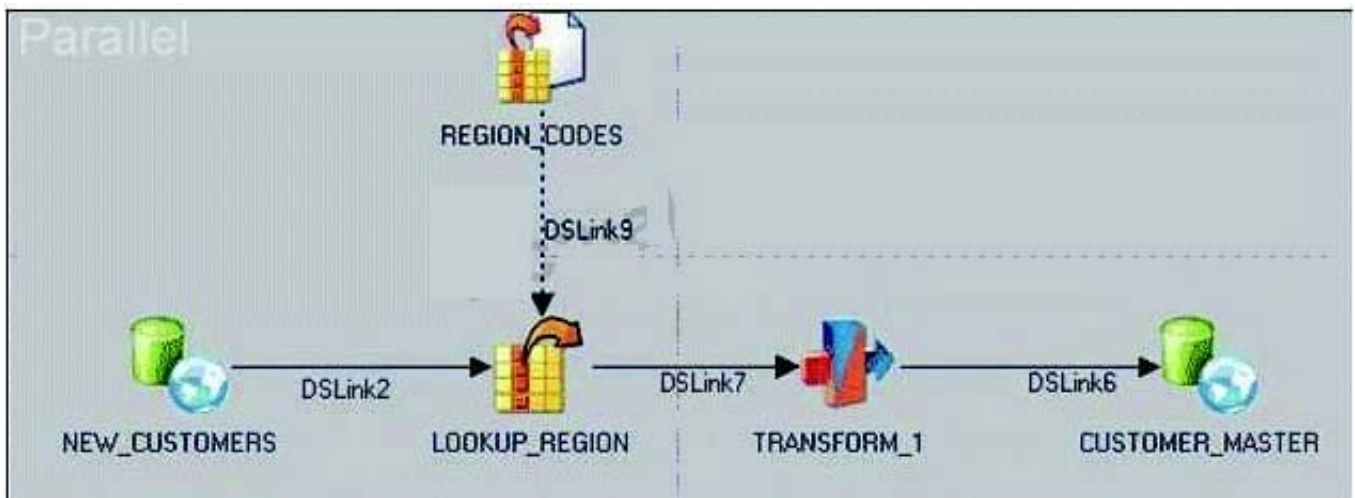

In addition to the table and schema names, what two element names must be specified when you create a shared table definition in DataStage Designer? (Choose two.)

- A. Database
- B. Project name
- C. Host system
- D. Database instance
- E. DataStage server system name

Correct Answer: AC

QUESTION 2

Click the Exhibit button.

The job in the exhibit runs to successful completion with no warnings. However, a validation test identifies that the CUSTOMER_MASTER table is empty. You suspect the cause to be related to the NEW_CUSTOMERS table or a defect in the job. Examining runtime metadata may help you track down the problem. Which two product features will help you isolate the cause of the problem? (Choose two.)

- A. Director job monitor tool.
- B. Designer Performance Analyzer tool.
- C. Designer "Show performance statistics" option.
- D. The view data button in the target Connector stage.

E. InfoSphere Metadata Asset Manager (IMAM) operational metadata reports.

Correct Answer: AC

QUESTION 3

A job design reads from a complex flat file, performs some transformations on the data, and outputs the results to a ISD output stage. How can the parameter values can be passed to this job at run-time?

- A. Include the parameter values in the data.
- B. Change the properties of the information provider.
- C. Pass the parameter values at the time of the service request.
- D. Execute a DSSetParam with the values at job execution time.

Correct Answer: C

QUESTION 4

What is the correct method to process a file containing multiple record types using a Complex Flat File stage?

- A. Flatten the record types into a single record type.
- B. Manually break the file into multiple files by record type.
- C. Define record definitions on the Constraints tab of the Complex Flat File stage.
- D. Load a table definition for each record type on the Records tab of the Complex Flat File stage.

Correct Answer: D

QUESTION 5

What two repositories does the Source Code Control Integration for DataStage and QualityStage serve? (Choose two.)

- A. WebSphere Repository
- B. Source Code Repository
- C. Universe Project Repository
- D. Information Analyzer Repository
- E. Information Server metadata Repository

Correct Answer: BE
