QUESTION 1

What provides the most value in helping developers find existing SOA services and driving reuse?

- A. Service monitoring
- B. An asset repository
- C. The Enterprise Service Bus (ESB)
- D. Access services to legacy systems

Correct Answer: B

QUESTION 2

Which three statements describe services within a SOA?

- A. Services are written in Java or C#.
- B. Services are compatible across technologies.
- C. Services can change location without affecting clients.
- D. Services provide an interface according to a SOAP file.
- E. Services can be stopped without disruption to the consumer.
- F. Service implementations can be changed without changing the consumers.

Correct Answer: BCF

QUESTION 3

When starting the journey to SOA, which action should be taken first?

- A. Create a pilot project to demonstrate the value of SOA to the business.
- B. Establish a development environment for shared services that can be used across the enterprise.
- C. Obtain organizational commitment to the SOA direction at the appropriate business and IT levels.
- D. Choose the correct Enterprise Service Bus (ESB) vendor as all other artifacts in the environment will be connected to this.

Correct Answer: C

QUESTION 4

Which artifact is the most helpful to an organization's SOA transformation and implementation roadmap?

- A. A reference architecture
- B. A service interface description
- C. A Web services standards glossary
- D. A proposed service registry document

Correct Answer: A

QUESTION 5

What most accurately describes a business process?

- A. The steps required to complete a unit of work in the optimal way
- B. An artifact used to capture the knowledge representing business requirements
- C. A flow of tasks that must be completed by systems or people in a certain order
- D. BPEL code that runs within a business process engine orchestrating the work of people and systems

Correct Answer: C
