QUESTION 1

An analyst has discovered that a company wishes to hold information about departments and employees. A department may have many employees in it, but each employee can, at any one time, only work in one department. There is no requirement to store historical information. However, there are currently eight departments and over one hundred employees. How would this relationship be shown on an Entity Relationship diagram?

- A. As (8..100) at the Department end of the relationship.
- B. As a many-to-many between Department and Employee.
- C. As a one-to-one between Department and Employee.
- D. As a one-to-many between Department and Employee.

Correct Answer: D

QUESTION 2

Linking a piece of delivered software functionality with a requirement is known as which of the following?

- A. Requirements validation.
- B. Requirements verification.
- C. Requirements testing.
- D. Requirements traceability.

Correct Answer: D

QUESTION 3

An IT department needs to upgrade its hardware to run the new version of an established operating system. The cost of this required upgrade is \$2 million. As an alternative, the IT director has suggested that the company should change to a completely different operating system. Although this will cost \$6 million, the change will bring many other benefits, including cheaper maintenance costs and increased security. What is the avoided cost in his proposal?

- A. \$2 million.
- B. \$4 million.
- C. \$6 million.
- D. \$8 million.

Correct Answer: A

QUESTION 4

Which of the following models might include the documentation of scenarios?

- A. A class model.
- B. A business activity model.
- C. A use case model.
- D. A corporate data model.

Correct Answer: C

QUESTION 5

When undertaking business system modelling how many Business Activity Models (BAMs) are initially produced?

- A. One for each system under consideration.
- B. One for each CATWOE.
- C. One for each Actor.
- D. One to reflect the perspective of the Owner.

Correct Answer: B
