QUESTION 1

A customer has reported that the Send E-mail button is failing. The synchronous workflow is not processing. What should be checked with the synchronous workflow?

- A. Make sure it is attached to the onClick event of the button.
- B. Make sure it is attached to the onChange event of the button.
- C. Make sure it is attached to the save sub action of the state transition.
- D. Make sure it is attached to the section action in the section that the button resides.

Correct Answer: A

QUESTION 2

An object migration package is being validated. Which log file shows the details of the validation?

- A. server.log
- B. Cache.log
- C. security.log
- D. ObjectMigration.log

Correct Answer: D

QUESTION 3

If the Dependent List box is checked, what must also be specified?

- A. List Size
- B. Master List
- C. Default Value
- D. Business Object

Correct Answer: B

QUESTION 4

Changes have been made to several queries and reports in the system. Which caches must be cleared in the Admin Console so the query and report changes can be applied?

- A. Portal Logo

- B. Query Cache
- C. Security Scope
- D. Object MetaData Cache

Correct Answer: B

QUESTION 5

The Building form utilizes a Contact query section to show all contacts associated to the Building. A user says that he remembers adding multiple contacts to the Building record last week but now no contacts appear in the Contact query section. When troubleshooting the associations, which statement is true?

- A. The association filter used in the query must also have the association defined in the Report Manager.
- B. The association filter for the query in the query section is no longer filtering by the association string created when the form adds records.
- C. The association filter used in the query must match what is defined in the Data Modeler's Association List for the Building business object (BO).
- D. The association filter used in the query must match what is defined in the Association Manager between the Building and Contact BO.

Correct Answer: B
