### QUESTION 1

In Report Studio, where can an author modify a global class to apply a change to all objects that use that class?

- A. Page Explorer
- B. Query Explorer
- C. Conditional Explorer
- D. Page Structure view

Correct Answer: A

---

### QUESTION 2

In Report Studio, an author is using a relationally modeled package and wants to filter a report to only include three specific products. If the author is not sure how to spell the product names, what is the fastest way to add the product names to the filter expression?

- A. Use a value prompt to have users select the product names.
- B. Use the Select Multiple Values feature to search for the product names.
- C. Add the product names from the Source tab in the Available components pane.
- D. Add the product names from the Data Items tab in the Available components pane.

Correct Answer: B

---

### QUESTION 3

In Report Studio, an author creates the following report:

| Product line   | Product type   | Revenue   |
|----------------|----------------|-----------|
| <Product line> | <Product type> | <Revenue> |
| <Product line> | <Product type> | <Revenue> |
| <Product line> | <Product type> | <Revenue> |

The author wants the report to show the total revenue generated by each Product line. How can the author accomplish this?

- A. In Query Explorer, change the Rollup Aggregate Function property for the Revenue data item to Total.

- B. In QueryExplorer, change the Rollup Aggregate Function property for the Product line data item to Total.
- C. In the layout, group the Product line column and then add an aggregate row showing total revenue values.
- D. In the layout, group the Product type column and then add an aggregate row showing total revenue values.

Correct Answer: C

#### QUESTION 4

In Report Studio, an author creates the following report:

| Product line   | Revenue   |
|----------------|-----------|
| <Product line> | <Revenue> |
| <Product line> | <Revenue> |
| <Product line> | <Revenue> |

The author wants each row of this report to contain a column chart displaying quantity sold for a particular product line. How can the author ensure that the chart in each row displays data for only the product line that appears in the same row?

- A. Add a column chart to the list, link the column chart to the same query used for the list and then add data to the chart.
- B. Add a column chart to the list, add data to the chart and then create a union relationship between the queries for the list and the chart.
- C. Add a column chart to the list, add data to the chart and then create an intersect relationship between the queries for the list and the chart.
- D. Add a column chart to the list, add data to the chart and then create a master-detail relationship between the queries for the list and the chart.

Correct Answer: D

#### QUESTION 5

In Report Studio, an author notices that the Revenue measure included in a list report has an Aggregate Function property of Total. What does this property mean?

- A. If the Auto Group and Summarize property for the query is set to No, the list displays total revenue values for the lowest level of detail in the report.
- B. If the Auto Group and Summarize property for the query is set to Yes, the list displays total revenue values for the lowest level of detail in the report.

C. If the Auto Group and Summarize property for the query is set to No, the list displays total revenue values for highest level of detail in the report.

D. If the Auto Group and Summarize property for the query is set to Yes, the list displays total revenue values for highest level of details in the report.

Correct Answer: B
