QUESTION 1

Steve wants to create a widget catalog on a server. Which template should he use to create it?

- A. tools.ntf
- B. widget.ntf
- C. toolbox.ntf
- D. widgetcat.ntf

Correct Answer: C

QUESTION 2

Clive is using an IBM Lotus Notes 7.0 client and needs to access a database that has been saved with the latest ODS revision. Can he do this?

- A. Yes, as long as the file is stored locally.
- B. No, ODS revisions are not backward compatible.
- C. Yes, as long as the file is retrieved via an IBM Domino server and not locally.
- D. Yes, ODS revisions are backward compatible regardless of where the file is retrieved from.

Correct Answer: C

QUESTION 3

The IBM Domino administrator is manually creating a directory from pubnames.ntf for external web user authentication. She wants the web servers that currently use Configuration Directories to utilize the new directory as their remote primary Domino Directory. Which step is required to configure this?

- A. Create a unique Domino domain name for the new directory in the Directory Assistance database.
- B. Replicate the new directory to all servers in the environment and enable HTTP web user authentication.
- C. Establish a mobile directory catalog and restrict new user creation to the new web user authentication directory.
- D. Specify the Domino domain of the servers with the Configuration Directories as the same in the Directory Assistance database.

Correct Answer: D

QUESTION 4

Which task is required to run IBM Domino Domain Monitoring (DDM) probes?

- A. DDM
- B. Event
- C. AdminP
- D. Collect

Correct Answer: B

QUESTION 5

What is a difference between the Replace Design and Refresh Design features in IBM Notes and IBM Domino?

- A. Refresh Design will not give an option to select a new template.
- B. Replace Design will not give an option to select a new template.
- C. Replace Design can be performed only with Manager access to a database while Refresh Design can be performed with Editor access.
- D. Refresh Design of a database will remove all Design elements in a database and replace them with those from a new template. This process also resets the database properties. Replace Design will do the same thing, but the Design properties of the database will not change.

Correct Answer: A
