### QUESTION 1

Unread marks can be replicated for selected databases. How would the IBM Domino Administrator set this option?

- A. Unread marks are on by default in all databases.
- B. By selecting the "Include Unread Marks" option in the Create New Replica dialog box.
- C. Open the Replication Options for the selected database and select the "Replicate Unread Marks" option.
- D. By using the Advanced Database Properties from the Domino Administrator or from the Database Properties box.

Correct Answer: D

---

### QUESTION 2

Which is true regarding IBM Notes Traveler?

- A. Traveler must be administered from a web browser and can't be administered using the IBM Domino Administration client.
- B. Traveler can be administered from the Domino Administration client only for High Availability (HA) pool configurations.
- C. Traveler can be administered from the Domino Administration client in both standalone server configurations as well as in HA pool configurations.
- D. Traveler can be administered from a web browser. Web-based administration is available in both standalone server configurations as well as in HA pool configurations.

Correct Answer: D

---

### QUESTION 3

Josh has been asked to rename a user as well as changing the user's Internet address. Which statement is true?

- A. Josh will need to use the Address Change procedure to change only the Internet address after the rename procedure is completed.
- B. When a user is renamed, Josh cannot change the user's Internet address as part of a change to the user's common or alternate name.
- C. When a user is renamed, Josh can change the user's Internet address as part of a change to the user's common or alternate name, but he cannot use this rename procedure to change only the Internet address.
- D. When a user is renamed, not only can Josh change the user's Internet address as part of a change to the user's common or alternate name, but he can also use this rename procedure to change only the Internet address.

Correct Answer: C

---

#### QUESTION 4

Craig has noticed a lot of incoming unsolicited e-mail is being generated from IP addresses beginning with the numbers 214.132.55. What should the entry in the "Deny connections from the following SMTP internet hostnames/IP addresses" field in the server\'s Configuration document be to prevent all of these IP addresses from connecting?

- A. [214.132.55.\*]
- B. 214.132.55.0/24
- C. 214.132.55.0...214.132.55.255
- D. [214.132.55.0-214.132.55.255]

Correct Answer: A

---

#### QUESTION 5

What it meant by anti-relay protection?

- A. The methods used to restrict what hosts can connect to an IBM Domino server for replication.
- B. The methods used to restrict what hosts can be accessed via a Domino passthru server.
- C. The methods used to restrict how many external e-mails a user can send through a Domino server.
- D. The methods used to prevent unauthorized use of the Domino SMTP server for external messaging.

Correct Answer: D
