QUESTION 1

Jack wants to be able to add a client-side JavaScript (CSJS) library as a resource to his XPages custom control. How would he accomplish this?

- A. Jack cannot accomplish this as resources can only be added to XPages and not custom controls.
- B. Within the Properties view of the custom control, select "Resources" and then add the appropriate resource by selecting from the prompts.
- C. Within the Events view of the custom control, select the onClientLoad event and insert the resource name within the client-side JavaScriptsection.
- D. Within the Properties view of the custom control, select "Dojo" and select the "Insert Custom Library" option. Then follow the prompts to add theappropriate library.

Correct Answer: B

QUESTION 2

Jenna is working on an XPage with multiple data sources which are document1, document2, view2, and view1. The XPage needs a new custom control that needs access to data source document2 from the XPage. After opening the custom control in IBM Domino Designer, how should Jenna pass the data source object handle "document2" from the XPage to the custom control?

- A. In the Resources tab section in the Properties tab, choose "Create a Data source" and select the form that document2 is using in the XPage.
- B. On the Property Definition tab, create a new property definition and for the Type, select "string". In the XPage, select the custom control, then go to the Custom Properties section and type in "document2.View;".
- C. On the Property Definition tab, create a new property definition and for the Type, select "dataInterface" from the complex types. In the XPage,select the custom control, then go to the Custom Properties section, click the Computed Property Icon and type in "return document2;".
- D. On the Property Definition tab, create a new property definition and for the Type, select "Domino Document" from the complex types. In theXPage, select the custom control, then go to the Custom Properties section, click the the Computed Property Icon and type in"getComponent (document2\\).getValue();".

Correct Answer: C

QUESTION 3

What would this code snippet accomplish when added to an XPage application?

```
<?xml version="1.0" encoding="UTF-8"?>
<xp:view xmlns:xf="http://www.ibm.com/xsp/core">
  <xp:this.data>
    <xp:dominoDocument var="document1" formName="main"></xp:dominoDocument>
    <xp:dominoView var="view1" viewName="main"></xp:dominoView>
  </xp:this.data>
</xp:view>
```

- A. defines a view as a Domino View data source
- B. defines a form as a Domino Document data source
- C. defines two forms as Domino Document data sources
- D. defines a Domino Document and a Domino View data source

Correct Answer: D

QUESTION 4

Gary is writing a view selection formula to only display documents which have a Status field value of "Complete". Which formula will display the correct documents?

- A. SELECT @All
- B. SELECT Status = "Complete"
- C. @If(Status = "Complete";View.Include)
- D. If Status.Value = "Complete" Then View.Select

Correct Answer: B
