QUESTION 1

Which statement is true about the Application Layout control?

- A. The Application Layout control provides a consistent interface when added directly to each XPage in an application.
- B. To render properly, the Application Layout control must implement one of the oneuiv2.1 themes or a theme that extends a oneuiv2.1 theme.
- C. The Application Layout control includes a total of three facet areas for adding content (left, center and right columns) and three bar areas for icons, titles, links and drop down menus.
- D. When the Application Layout control is enabled for an application each XPage will include a left, center and right column area with the same dimensions to provide a consistent user interface across the application.

Correct Answer: B

QUESTION 2

Charles will use DOM to access document-related data using server-side JavaScript. Which class would Charles use to access character data?

- A. DOMTextData
- B. DOMComment
- C. DOMCharacterData
- D. DOMDocumentType

Correct Answer: C

QUESTION 3

Marco has designed a mobile application with two mobile pages. For the first mobile page he set the pageName property to "viewMobilePage" and for the second mobile page he set the pageName property to "documentMobilePage". He designed the viewMobilePage to display a listing of customer names from the CustomersByName view. He designed the documentMobilePage to display the document details for the customer touched on the viewMobilePage. He specified "customerDoc" as the name for the Domino Document data source and the field with the customer phone number is named "phone". What can Marco do to add a touch control to dial the phone number for the customer currently displayed on the documentMobilePage?

- A. For the Edit Box control bound to the phone field add the property and value of type="tel".
- B. Nothing. Access to the phone dialer of the mobile device is not supported for mobile applications developed using the Mobile controls in Domino Designer.
- C. Add a Tool Bar Button control and compute its href property using this server-side JavaScript: return "tel:" + customerDoc.getItemValueString("phone");
- D. Add a Rounded List Item control and compute its phone property using this server-side JavaScript: return

```
customerDoc.getItemValueString("phone");
```

Correct Answer: C

QUESTION 4

Which navigator control only works with data within the same database?

- A.
- B.
- C.
- D.

Correct Answer: B

QUESTION 5
