Correct Answer: B

QUESTION 3

What does IBM Notes Traveler 9.0 require in High Availability mode?

- A. SIP Proxy
- B. IP Sprayer
- C. IBM Connect
- D. triple-homed firewall

Correct Answer: B

QUESTION 4

An administrator adds User A to an IBM Notes Traveler device settings document, which requires an alphanumeric password for Apple devices. The administrator then adds User A to Group A, which is listed in the Notes Traveler Policy Settings document. The Notes Traveler Policy Settings document requires Apple users to have a device password length of 6.

What behavior will User A experience on the device?

- A. User A will be required to have an alphanumeric password.
- B. User A will be required to have the device password length of 6 characters.
- C. User A will not be prompted for a password at all because two policies have been applied.
- D. User A will not be prompted because this security option is not supported for Apple devices.

Correct Answer: B

QUESTION 5

How must IBM Notes Traveler be administered after the server has been added to a high availability pool?

- A. A web browser must be used to access the lotustraveler.nsf.
- B. The IBM Notes client must be used to access the lotustraveler.nsf.
- C. After integration into the server pool, only the IBM Domino dynamic policies may be used.
- D. The IBM Domino Administrator client must be used to access the lotustraveler.nsf on any of the members of the server pool.

Correct Answer: A
