Following Questions and Answers are all new published by IBM Official Exam Center

QUESTION 1

An IBM Notes Traveler administrator wants to ensure the Derby database will automatically be defragged every 30 days, so the notes.ini parameter NTS_DEFRAG_INTERVAL_DAYS=30 is added.

What else must be done for the Derby database to defrag?

A. The administrator must also add the notes.ini parameter NTS_LAST_DEFRAG.

B. Nothing else is necessary, the defrag will then occur every 30 days automatically.

C. The Notes Traveler server must be shut down and restarted at least every 30 days.

D. The administrator must shut down Notes Traveler the day before the defrag is scheduled.

Correct Answer: C

QUESTION 2

How does the IBM Notes Traveler server obtain the ability to communicate with the enterprise database?

A. The administrator must install the IBM WebSphere Administration client.

B. Notes Traveler is pre-installed with all JDBC drivers for the supported databases.

C. The database drivers are configured when the travelerutil command is executed.

D. The administrator must copy the required JDBC jar files from the enterprise database or obtain these from the database vendor.

Correct Answer: D

QUESTION 3

Charles has opened an issue with IBM Support. The Software Engineer asks him to issue the tell traveler PMR command at the IBM Domino server console.

What does this command do?

A. sends only the device detail and user detail information to IBM Support

B. begins adding the PMR number to any log files created after the command is issued

C. performs a system dump of log files, creates a log file collection, and automatically uploads it to IBM Support

D. performs a system dump of log files and creates a log file collection for Charles to send to support at his convenience

Correct Answer: C

QUESTION 4

How can a user determine if the IBM Notes Traveler server is available from their mobile device?

A. Check the HTTP Sync protocol.

B. Check the Notes Traveler Sync protocol.

C. Use the Check Traveler tool to test the connection.

D. Access the Notes Traveler homepage using a browser on the device.

Correct Answer: D

QUESTION 5

How must IBM Notes Traveler be administered after the server has been added to a high availability pool?

A. A web browser must be used to access the lotustraveler.nsf.

B. The IBM Notes client must be used to access the lotustraveler.nsf.

C. After integration into the server pool, only the IBM Domino dynamic policies may be used.

D. The IBM Domino Administrator client must be used to access the lotustraveler.nsf on any of the members of the server pool.

Correct Answer: A
