QUESTION 1

A client wants to write several portlets for their new website. Each portlet must be labeled and record some trace information whenever it is accessed. The portlets must share common information with each other as well. When discussing best practices options with the client, which of the following would not be recommended?

A. Each portlet can be labeled by its own title bar.

B. JSPs should be used to separate output and functionality of the portlets.

C. Portlets communicate via writing to a common file in the root directory.

D. Trace information can be logged to log files.

Correct Answer: C

QUESTION 2

Carl is trying to create a theme based on a modularized IBM WebSphere Portal theme. He is ready for deployment, but is unsure of the structure he needs to use to accomplish this. What would be the proper deployment structure for this theme?

A. Create an ZIP file that contains one WAR file containing the dynamic content of the theme and one JAR file containing a .content filereferencing the static content.

B. Create a custom version of the dynamic content from the modularized theme as a new EAR file and a custom version of the static content bycreating a folder in the file store for it.

C. Create a WAR file that contains an ZIP file containing an EAR file that includes both static and dynamic content.

D. Create a folder for the theme in the file store, and create a WAR file containing an exact copy of this theme. All associations between static anddynamic content will be made once both are associated by sharing similar context roots.

Correct Answer: B

QUESTION 3

John is developing a portlet that uses the portlet client model API to manipulate a user\\'s profile on the client side. How can he get the object of the PortletWindow that represents the portlet on the client side?

A. new ibm.portal.portlet.PortletWindow("")

B. new ibm.portal.portlet.PortletWindow()

C. this.getPortletWindow()

D. this.getPortletWindow("")

Correct Answer: A

QUESTION 4

Emery is trying to make it so users from a specific geographic location do not have access to a specific metrics application hosted on their IBM WebSphere Portal server. Which of the following options is provided within WebSphere Portal that Emery can use to this purpose?

A. Emery can use the call to ensure the portlet is hidden for thegeography to block.

B. Emery can use Personalization Rules to hide the portlet, leveraging information in the user repository regarding the user\\'s geographiclocation.

C. Emery\\'s users must register as being from a specific geography and Emery can develop workflow methods leveraging thePortalUserIdentityBean (or PUIB) object to ensure the portlet does not generate markup for the user in this geography.

D. None of the above. Emery is going to need to create a page and assign metadata parameters to hide the specific portlet from users fromgeographies that are not allowed to see it.

Correct Answer: B

QUESTION 5

Corrie needs to create several iWidgets that will interact with each other. She is evaluating the mechanisms that she can use to share state information between the iWidgets. Which one of the following options is the best way to accomplish this?

A. Use the JSR 286 defined event and payload mechanism.

B. Store state information in the user\\'s session.

C. Implement public render parameters.

D. Declare the state sharable in the ItemSet definition and register listeners in the individual iWidgets to be informed when shared state changes.

Correct Answer: D
