QUESTION 1

Which of the following is not a valid reason for deploying a separate Personalization Server?

- A. To reduce the load on the IBM WebSphere Portal Servers.
- B. To use Personalization in Web Services that will provide personalized XML content stream for use by portlets.
- C. For generation of a personalized RSS feed for use by portlets or other software components.
- D. To provide dedicated resources for rendering a portlet that may have complex security and personalization rules.

Correct Answer: D

QUESTION 2

Which of the following statements about URL mapping is true?

- A. A single portal page can have only one friendly URL.
- B. Friendly URLs do not have control over setting the language for a page.
- C. Users must have the Editor role for a page to create a URL mapping context on that page.
- D. A friendly URL is a valid URL mapping context.

Correct Answer: D

QUESTION 3

After deploying a remote search service on a server, which of the following best describes how a portal administrator would configure portal search to use the remote search service?

- A. Configure the remote search service parameters in the wkplc.properties file and run the ConfigEngine enable-remote-pse-service command.
- B. For the WP Configuration service, set the pse.remote.type custom property to match the type of remote search service that was deployed.
- C. From the Manage Search portlet, define a new search service and set the PSE_Type parameter to the remote search service type (i.e., SOAP).
- D. Set the Portal Search Center portlet configuration parameter named search_type to remote and search_name to the hostname of the server where the remote search service has been deployed.

Correct Answer: C

QUESTION 4

Which one of the following statements is not true regarding Multiple Profiles?

- A. Multiple profiles share the program files (binaries).
- B. Each IBM WebSphere Portal profile maintains its own independent configuration.
- C. ConfigEngine commands must be performed at the master configuration in order to propagate changes across all virtual profiles.
- D. All virtual profiles must be taken down when performing maintenance on the WebSphere Portal installation.

Correct Answer: C

QUESTION 5

Sherry has just installed a new stand-alone IBM WebSphere Portal Server and now wants to configure the portal to use a stand-alone LDAP server. Which one of the following property files will Sherry modify to contain the LDAP server information?

- A. wkplc_ad.properties
- B. wkplc.properties
- C. wkplc_ldap.properties
- D. wkplc_ldapdomain.properties

Correct Answer: B
