QUESTION 1

Janet is a content creator. She cannot perform the Restart Workflow action for a published item that she created. Which of the following options best describes why this is occurring?

- A. She is not an administrator; only an administrator can restart the workflow.
- B. She does not have Approve access to the content item.
- C. She has the content item open in Read mode.
- D. Restart Workflow is not a valid action for a published content item.

Correct Answer: B

QUESTION 2

An IBM Web Content Manager administrator would like to restrict a group of users to see only content and components (i.e. image, html, menu, navigator, etc.) in a Web Content Manager Authoring portlet. How can this be done?

- A. Use the Web Content Libraries portlet to set access control on library resources.
- B. Assign the group of users contributor access to the content library.
- C. Configure the "View Options" found within the Web Content Manager Authoring Portlet Settings.
- D. Assign the group of users to both the user and contributor roles at the content library root.

Correct Answer: A

QUESTION 3

Rich wants to create a custom workflow action that writes a message to an external audit log whenever the action is invoked. Rich needs to perform each of the following steps, except which one?

- A. Create the custom workflow action class that extends the `com.ibm.workplace.wcm.api.custom.CustomWorkflowAction` Interface.
- B. Reference the custom workflow action in the IBM Web Content Manager `WCMConfigService` service.
- C. Create the necessary `plugin.xml` file to register the action with the IBM WebSphere Portal server.
- D. Deploy the class to the WebSphere Portal server as an EAR or WAR application or a stand-alone JAR file.

Correct Answer: B

QUESTION 4

When syndicating an IBM Web Content Manager library, the following statements are all true except:

- A. First-time syndication to an existing library is not supported. If you attempt to syndicate a library to a subscriber that already has a library with the same name, an error results.
- B. Information about a Library is only syndicated the first time syndication occurs and not on subsequent updates and rebuilds. If a library is renamed or library user access is changed, this information is not syndicated to the Subscriber.
- C. If content from one library (Library A) uses an item from another library (Library B), you must include both libraries in the syndicator. Including both libraries ensures that all items are syndicated successfully.
- D. When you switch from "all item" syndication to "live and projects" syndication or "live item" syndication, any drafts previously syndicated to the subscriber are removed.

Correct Answer: D

QUESTION 5

Which of the following statements is not true about site areas?

- A. Site areas can be used to build the site framework within which content items can be grouped.
- B. The relationships between authoring templates and presentation templates are set in site areas.
- C. Content items can be saved within multiple site areas and multiple site frameworks.
- D. Site frameworks can contain multiple top-level site areas.

Correct Answer: D
