Correct Answer: D

---

#### QUESTION 4

Michael is creating an XPage for his company's satellite tracking application. The XPage is bound to the satinfo form as a data source that contains basic information about the requested satellite. There is also a custom control on the XPage that is bound to the maintenance form as a data source, which displays information about the satellite's maintenance history. When Michael adds a submit button to the XPage, he wants the data entered into either section to be saved to the appropriate form.

What does Michael need to do to accomplish this?

- A. Click the submit button, then select the events view. Next select the onclick mouse event, and click "Add Action". Select "Save Data Sources".
- B. Click the submit button, then select the actions view. Next select the onclick mouse event, and click "Add Action". Select "Save DataSources".
- C. Click the submit button, then select the data view. Next select the onclick mouse event, and click "Add Action". Select "Save Data Sources".
- D. Click the submit button, then select the properties view. Next select the onclick mouse event, and click "Add Action". Select "Save DataSources".

Correct Answer: A

---
