### QUESTION 1

Your company, ACME Marble, has users located around the globe, and organizational unit certifiers have been created for each geographic area. You have created an ID vault for the /ACMEMarble organization level that is replicated as well as geographic vaults for Americas, Europe, Asia, and Australia on servers located in those regions. If a user in Europe has a vault policy, in which of the following vaults will the ID be placed?

- A. The local vault for Europe will collect the user ID
- B. The conflict will not allow any ID to be collected by a vault
- C. The ID will be placed in both the geographic and the organizational vaults
- D. The main vault for /ACMEMarble overrides the geographic vaults and will collect the ID

Correct Answer: A

---

### QUESTION 2

You are in the process of upgrading your Domino environment to version 8.5 and have implemented the ID vault on one of the servers as well as some of the deployed clients. The clients are attempting to upload their ID files to the vault on home servers that are not version 8.5 yet. Which of the following will the client experience next?

- A. The Notes client presents an error that an ID vault is not available on the home server
- B. The Notes client asks its home server for a list of servers that have a replica of the vault
- C. The Notes client does NOT present an error but will not be able to upload the ID file to a vault
- D. The Notes client will generate a notification to the ID vault managers notifying them of the failed attempt

Correct Answer: B

---

### QUESTION 3

To remove an ID vault from a Domino server, you must be a vault administrator, have Editor Access to the Domino Directory, and which of the following?

- A. Have access to the vault ID file and password
- B. Have Manager rights to the Administration Process database
- C. Have the ability to delete user policy documents from the Domino Directory
- D. Have physical access to the operating system to complete the removal process

Correct Answer: A

---

### QUESTION 4

Creating an ID vault on your Domino server requires administrator access to the server on which you create it, Editor access to the Domino Directory, and which of the following?

- A. Create databases and templates access
- B. Membership of the ID Vault Admins group
- C. The ID Vault Admin role in the Domino Directory
- D. The ID Vault secret key generated from the server ID file

Correct Answer: A

---

#### QUESTION 5

In a Lotus Domino environment with an active ID vault, how should an administrator successfully issue key roll-overs?

- A. The administrator should issue the key roll-over, which updates the ID vault and then the userID file
- B. The administrator should issue the key roll-over, which updates the user ID file and then the ID vault
- C. The user should issue the key roll-over request, the administrator approves the request, and the user ID gets updated and then the ID vault is
- D. updated
- E. The user should issue the key roll-over request, the administrator approves the request, and the ID vault gets updated and then the user ID file
- F. is updated

Correct Answer: A
